#### ABSTRACT

This report assesses transfer issues from the student perspective in British Columbia. It centers on determining: where transfer students went for further studies; the nature of the transfer-related problems that were encountered; and the frequency these transfer-related problems were cited. The following five sub-cohort pairings, defined within each of the two major program type cohorts, were analyzed in order to discover significant differences in transfer-related behavior and experience: (1) comparing lower division Arts and Sciences students who continued studies with those who did not; (2) for students who continued studies, comparing students who attempted to transfer credits with those who did not; (3) for students who continued studies and attempted to transfer credits, comparing students who encountered transfer problems with those who did not; (4) for students who continued studies, attempted to transfer credits, and encountered transfer problems, comparing students who attempted to transfer the original credential (or all completed course-work) as one whole block of credits towards their new program with those who did not; and (5) for students who continued studies, attempted to transfer credits, and encountered transfer problems, comparing students who encountered transfer problems only at the old institution (sending) with those who encountered transfer problems at the new institution (receiving). It presents key findings and recommendations. The paper includes the questionnaire instrument in appendices. (Contains 14 references.) (VWC)

# Executive Summary

#### **PURPOSE**

The foremost 1996-97 priority of the British Columbia Council on Admissions and Transfer (BCCAT) was to promote articulation and transfer of post-secondary courses and programs to baccalaureate degree programs. Key to the continuing development of standards and practices that facilitate transfer was an integrated research plan; a plan that had as its initial objective the identification and assessment of current transfer issues. The assessment of transfer issues required the collection of information from two primary sources: (1) institutional admissions and transcript records along with transfer articulation policy statements, intended to provide the institutional perspective on transfer issues, and (2) quantitative and qualitative information from students themselves, intended to provide the student perspective.

Utilising 57,973 student surveys collected over the past three years, this study represents B.C's most ambitious undertaking to-date to assess transfer issues from the student perspective.

Specifically, the study benchmarks the second phase of a two-year effort on assessing issues surrounding intra-provincial credit course transfer primarily within British Columbia's public post-secondary education system. The first phase study, completed in 1996, was comprised of a questionnaire item analysis of the 1995 and 1996 B.C. college and institute student outcomes surveys. The analysis resulted in specific transfer-related changes to the follow-up 1997 student outcomes survey. This second phase study focused on analysing 1997 student outcomes data derived from the new transfer-related questions.

The research objectives centred on determining:

- where transfer students went for further studies;
- the nature of the transfer-related problems that were encountered; and
- the frequency these transfer-related problems were cited.

Research funding was provided by the British Columbia Council on Admissions and Transfer, an independent 18 member body charged with providing leadership and direction in expanding educational opportunities for students through inter-institution transfer and the review of admission requirements. The student outcomes data used was collected by BCs college and institute system through an annual data collection effort funded primarily by the Ministry of Advanced Education Training and

Technology and Human Resources Development Canada. A data sharing agreement was approved by the outcomes data steward (the Outcomes Working Group) and was supported and arranged through the outcomes data custodian (CEISS).

#### APPROACH

The analysis of transfer issues was delimited to former coilege and institute students who attended further studies. These students exited from programs either (1) designed as university transfer programs or, (2) oriented to provide "ready-to-work" skills. These two "major program type" student groups were the principal "within group" assessment cohorts used throughout the analysis, and are referred to as the "Arts and Sciences" student cohort and the "Applied" student cohort, respectively.<sup>1</sup>

The following five sub-cohort pairings, defined within each of the two major program type cohorts, were analysed in order to discover significant differences in transfer-related behaviour and experience:

**Sub-Cohort 1:** comparing lower division Arts and Sciences students who continued studies with those who did not;

Sub-Cohort 2: for students who continued studies: comparing students who attempted to transfer credits with those who did not;

Sub-Cohort 3: for students who continued studies and attempted to transfer credits: comparing students who encountered transfer problems with those who did not;

Sub-Cohort 4: for students who continued studies, attempted to transfer credits, and encountered transfer problems: comparing students who attempted to transfer the original credential (or all completed course-work) as one whole block of credits towards their new program with those who did not; and

**Sub-Cohort 5:** for students who continued studies, attempted to transfer credits, and encountered transfer problems: comparing students who encountered transfer problems only at the old institution (Sending) with those who encountered transfer problems only at the new institution (Receiving).

A total of 181 indicators were initially developed for formal statistical testing. All were derived from either student records supplied directly by the admissions and records offices of the Sending institution, or from the 1995, 1996 and 1997 student outcomes survey responses. The analysis approach centred on employing appropriate

BCCAT

<sup>1</sup> A listing of 1995-97 College and Institute programs grouped under each program type can be found in Appendix 3.

statistical tests on 143 of the most promising indicators to discover significant differences between each sub-cohort pairing. Formal statistical tests were carried out using either the chi-square test (for association between crosstabulated factors) or the Student's T-test.

#### RESULTS

#### **KEY FINDINGS FOR ALL 1997 STUDENTS:**

- The cohort of students who attended further studies at a different institution was comprised of almost equal numbers of former college and institute Applied program students and Arts and Sciences students (48% and 52% respectively). However, proportionately more of the Arts and Sciences cohort attended further studies (64% compared to 24% for the Applied cohort).
- 3,924 former Arts and Sciences students attended further studies, which accounted for 73% of all Arts and Sciences survey respondents (3,460 at a different institution and an additional 464 at the same institution but in a different program).
- 3,867 former Applied students attended further studies, which accounted for 29% of all Applied survey respondents (3,229 at a different institution and an additional 638 at the same institution but in a different program).
- The most prevalent destination for former Applied students from Urban Colleges and University Colleges was a B.C. University (47% and 34% respectively).
- For Applied students from Rural Colleges and Technical Institutes, the most prevalent destination was Other Institution (41% and 38% respectively).
- The most prevalent destination for Arts and Sciences students from any Sending institution was a B.C. University (77% of Urban College students, 60% of University College students, and 59% of Rural College students went to a B.C. University).
- Of the 3,460 former Arts and Sciences students who attended further studies at a different institution, 82% (2,842) tried to transfer credits.
- 444 of the 2,842 Arts and Sciences students who tried to transfer credits experienced problems (16%).
- 280 of the 1,539 Applied students who tried to transfer credits experienced problems (18%).

#### **KEY FINDINGS BY SUB-COHORT:**

## Lower Division Arts and Sciences Students Who Continued Studies versus Those Who Did Not (Sub-Cohort 1)

- Students who attended further studies at a different institution were 3 years younger than those that did not continue their studies.
- More students who did not attend further studies originally enrolled for job skills reasons (e.g., improve existing job skills, learn new job skills) (34% compared to 19% for students who persisted).
- More than half of the students who did not attend further studies exited from a University College (56% compared to 42% for students who persisted).
- Nearly half of the students who continued their studies exited from Urban Colleges (47%). In contrast, just a third of the students who did not continue their studies exited from Urban Colleges (33%).
- Students who did not attend further studies earned lower GPAs, on average, than did students who persisted.
- No difference existed between the two cohorts in relation to the number of credits earned, as reported from official transcript records. Both had earned an average of 50 credits.
- To a greater degree, students who did not attend further studies indicated that their original program workload was heavy.
- 80% of the students who did not attend further studies were employed one year after leaving their studies, compared to 64% of the students who continued their studies.

## Students Who Attempted to Transfer Credits versus Those Who Did Not (of students who continued studies) (Sulv-Cohort 2)

- For the cohort of Applied students continuing their studies, those that tried to transfer credits were significantly younger than those that did not try to transfer credits. This pattern was mirrored for the Arts and Sciences student cohort. The gap in age was more pronounced for Applied students than for the Arts and Sciences students (greater than 3.5 years and less than 1.9 years respectively).
- A greater proportion of Arts and Sciences students who continued their studies and transferred credits, went to a B.C. University (79%), than did those that continued their studies and didn't transfer credits (14%). Although the magnitude was lower, this B.C.

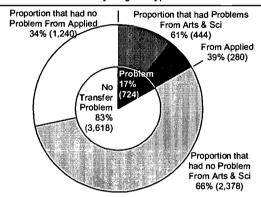

- University attendance pattern was repeated for the Applied student cohort (55% of those that transferred credits went to a BC University versus 9% that did not transfer credits).
- A greater proportion of Arts and Sciences students who continued their studies and did not transfer credits, went to either an independent institution, a B.C. Technical Institute, or a B.C. University College (31%, 23%, and 19% respectively), than did those who continued their studies and transferred credits (4% to each Receiving institution type). Once again, this destination pattern was repeated for the Applied student cohort (40% versus 19% to independent institutions, 20% versus 7% to B.C. Technical Institutes, and 15% versus 8% to B.C. University Colleges).
- In light of the preceding two observations, it can be argued that destination (Receiving) institution patterns depended significantly more on whether or not the act of transferring credit occurred than it did on the Applied versus Arts and Sciences program area students exited from originally.
- Another pattern that was similar for both the Applied and the Arts and Sciences cohorts was that a significantly greater proportion of students who did not try to transfer credits cited that they originally enrolled in their Sending institution program to get job skills than did students who transferred credits. In this case, however, the magnitudes were markedly different (31% vs. 16% for Arts and Sciences programs, 65% vs. 44% for Applied).

# <u>Students</u> Who <u>Encountered Transfer Problems</u> <u>versus Those Who Did Not (of students who continued studies and attempted to transfer credits)</u> (Sub-Cobort 3)

- For the vast majority of students, BCs credit course transfer processes are working. Of the 4,381 student respondents in the 1997 survey that attempted to transfer credits, 724 (17%) experienced transfer problems (280 students from Applied programs and 444 from Arts and Sciences).
- Nearly half (48%) of the students cited that one of the transfer-related problems they encountered was the courses or original program were not designed for transfer. This indicates that although students knew that some of their previously completed courses were not going to transfer, they cited this as a problem anyway.
- Although the majority of students that experienced transfer problems originally exited from Arts and Sciences programs (61%), a slightly greater

- proportion of Applied students experienced transfer problems (18% versus 16%). Since the bulk of Applied programs are not designed with transfer in mind, the fact that these proportions were so similar was somewhat surprising.
- In concordance with the most important destination of transfer students, more than two thirds of all transfer problems were related to transferring to a B.C. University (71%).
- The Receiving institution type with the smallest ratio
  of problems per student, was the University College
  category with an average of 3.5 problems cited per
  student. In contrast, 4 problems were cited per
  student attending all other institution types.

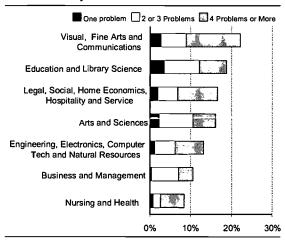

1997 Distribution of the Incidence of Transfer Problems by Program Type

- The Visual, Fine Arts and Communication Applied program area had the highest proportion of students citing at least one problem (32%). This program area also exhibited the highest proportion of students citing four or more problems (18%).
- The Arts and Sciences students in Visual, Fine Arts and Communication program area also had the highest proportion of students experiencing problems (23%). By comparison, Arts and Sciences students in the Nursing and Health area yielded a markedly lower proportion citing problems than did Applied students in this same area (8% versus 22%).
- For either cohort, Overall Satisfaction with Studies was better for students who did not experience transfer problems compared to those who did.

#### Arts and Sciences Students that Tried to Transfer Credits by Program Area of Further Studies and by Number of Transfer Problems

- For either cohort, a greater proportion of students who experienced transfer problems went to Out-of-BC Universities, than did students who cited no transfer problems.
- For either cohort, students who experienced transfer problems stated they were less prepared for further studies than did students who did not experience transfer problems.
- Generally, students encountering problems were not as satisfied with their college experiences and resultant skill development as were their no-transferproblem counterparts (index values < 1).</li>

Students Who Attempted to Transfer the Original Credential (or all completed course-work) as One Whole Block of Credits Towards Their New Program versus Those Who Did Not (of students who continued studies, attempted to transfer credits, and encountered transfer problems) (Sub-Cohort 4)

- Of the 724 students in the survey who had tried to transfer credits and experienced transfer-related problems, 701 answered the follow-up question "Did you attempt to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study)". Over 77% (542) of these students answered "yes". In other words, the overwhelming majority of students who reported having transfer problems, encountered these problems while attempting to transfer one whole block of credits.
- For four out of five students, most common transfer problem was that some courses were not transferred.
   The relative proportions of the block transfer cohort and its non-block transfer counterpart that cited each

- particular transfer problem were remarkable in that very little variance was observed between the two populations. Only one transfer problem, "Had Completed More Credits than Was Allowed to Transfer", produced any notable difference between block and non-block Arts and Sciences cohorts (32% and 22%, respectively).
- As was found for the Arts and Sciences cohort, the most common transfer problem for Applied students was the fact that some courses were not transferred: this being true for an average of nine out of ten students. The lack of variance between the degree block transfer and the non-block transfer cohorts cited each transfer problem paralleled previous results. Again, "Had Completed More Credits than Was Allowed to Transfer", produced the only notable difference between the Applied student cohorts (41% and 24%, respectively).
- For either the Applied or the Arts and Sciences cohort, the "Relationship Between Past and Further Studies" was stronger for students who attempted to transfer their original credential or all their completed course-work as one whole block, than it was for those who did not attempt to block transfer. For both the Arts and Sciences cohort and the Applied cohort, it is a factor of about 10% better (index values of 1.09 and 1.13, respectively).
- The "Extent to Which Transfer Was a Problem" was greater for the block transfer Applied student cohort than it was for the non-block transfer Applied student cohort (index of 1.18).
- The "Number of Transfer Problems Experienced" was greater for the block transfer Applied student cohort than it was for the non-block transfer Applied student cohort (index value of 1.15).

Students who encountered transfer problems only at the old institution (Sending) versus those who encountered transfer problems only at the new institution (Receiving) (of students who continued studies, attempted to transfer credits, and encountered transfer problems) (Sub-Cohort 5)

- For either cohort, the transfer problem cited most often was the fact that some courses didn't transfer.
   A higher proportion of students citing problems at the Old institution said they didn't know the requirements, than did students citing problems at the New institution (40% and 27%).
- The majority of students experiencing Slow Service and Poor Advice only at an Old institution, originally exited from Arts and Sciences programs (75%)

GDA Research & Information Systems, Inc.

BCCAT

contrasted with 50% of those that had Slow Service and Poor Advice only at a New institution.

- A higher proportion of students experiencing problems only at a New institution had previously completed a certificate, degree or diploma (18% contrasted with 5% of those with problems only at an Old institution).
- A higher percentage of students experiencing problems only at a New institution completed the requirements for their program credential, compared to those who experienced problems only at an Old institution (48% vs. 30%).
- Students with problems only at an Old institution had lower average GPAs than students experiencing problems only at a New institution (index of 0.92).

Results for the 1995, 1996, and the three-year 1995-97 combined groups are contained in Appendix 4.

#### RECOMMENDATIONS

#### SURVEY INSTRUMENT RECOMMENDATIONS

1997 was the first data collection cycle of the college and institute student outcomes survey that included the new transfer-related questions based on the first phase research of this project. Although a wealth of information related to transfer issues was collected, the following four questionnaire refinements are offered to improve its future utility:

**Recommendation 1:** Add a Question to Help Identify the "Most Problematic" Transfer Problem.

Not knowing the magnitude of the transfer problems cited by each student surveyed, resulted in not being to assess which problems were the most important. An indication of which problem was the most important, can be derived by adding the following question: "Which one of the transfer problems you experienced had the greatest negative impact on your transfer request?"

Recommendation 2: Modify the Questionnaire Skip Patterns to Capture Appropriate Transfer Problem Information From All Students Who Attended Further Studies.

The following two "transfer problems questions" should be asked of all students who attended further studies (Q10=Yes), not only to those that had problems:

Q15B "How many courses, if any, did you NOT receive credit for?" would become for those that did not have problems: "How many courses, if any, did you receive credit for?" and

Q15F 'Did you attempt to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study)".

Recommendation 3: Modify Question 15F, "Did you Attempt to Transfer Your Original Credential (or All Completed Course-work), as One Whole Block of Credits Towards Your New (Current) Program (or Field of Study), did you Receive All Credits You Expected?", so as to Better Capture FORMAL Block Transfer Students.

Only students who completed a credential (diploma or certificate or degree) should be asked this suggested rephrased question 15F: "Did you attempt to transfer your completed credential for one or two years of credit, rather than transferring all your courses individually?"

**Recommendation 4:** If any Transfer Questions Need to be Eliminated Because of Questionnaire Length, Those Related to Origin of the Problem Being at the Old or New Institution Should be the First Considered.

This analysis has shown that not a great deal of information could be derived from the 1997 survey respondents for this set of questions (Q15E1 through Q15E4). The current "mark all that apply" directive does not enable the identification of the worst/greatest negative impact.

#### **FURTHER STUDY RECOMMENDATIONS**

- Incorporate (LINK) presently disparate administrative data from university admissions and records systems, with both university and college/institute student survey records.
- Conduct an analysis focusing on the full-time or parttime status of students.
- Once the 1998 college and institute outcomes data are available, combine the 1997 with the 1998 data sample and conduct a Program/ Discipline-based cohort analysis of transfer-related issues.
- 4. Conduct an analysis on the persistence of students exiting the subset of programs designed to offer only the first two years of an integrated four-year program that require the student to transfer to a University to complete the degree.
- Utilise the 4th year of college and institute student outcomes data in 1998 to conduct regression tests to assess indicator trends.
- 6. Conduct a longitudinal tracking study to specifically assess the transfer-related issues of Stop-Outs.
- 7. To complement this student perspective analysis of transfer issues, conduct Focus Groups involving admissions / other transfer articulation groups at the colleges and universities to derive the "administrative perspective."

The British Columbia Council on Admissions and Transfer (BCCAT) along with Gaylord, Ducharme and Associates (GDA), would like to acknowledge the contributions of the following peer reviewers of this province-wide post-secondary education student transfer study and its predecessor Phase I study:

Dr. Roger Blackman Associate Dean of Arts Simon Fraser University

Dr. Patty Beatty-Guenter Registrar & Inst. Research Director North Island College

Mr. Ken Burt Director, Inst. Research & Planning Okanagan University College

Dr. Rod Church Director, Inst. Research & Planning Malaspina University-College

Mr. Bob Cowin Director, Institutional Research Douglas College

Dr. John D. Dennison Professor Emeritus University of British Columbia Ms. Finola Finlay Special Advisor to the Council B.C. Council on Admissions and Transfer

Dr. Alice Mansell Vice President, Academic Technical University of British Columbia

Dr. Martin Petter Provost, Open University Open Learning Agency

Mr. Walter Sudmant Manager, Planning University of British Columbia

Dr. Alastair Watt Associate Director, Inst. Research & Planning University College of the Cariboo

Dr. Walter Wattamaniuk Director of Analytical Studies Simon Fraser University

This BCCAT-funded study represents the second phase of a two-year effort to assess the student perspective on transferring within the B.C. public post-secondary education system. The first phase was comprised of a questionnaire item analysis that resulted in specific transfer-related changes to the B.C. college and institute student outcomes survey. The second phase focused on analyzing student outcomes data derived from these new transfer-related questions. The data used was collected by BC's college and institute system through an annual data collection effort funded primarily by the Ministry of Advanced Education Training and Technology and Human Resources Development Canada. A data sharing agreement was approved by the outcomes data steward (the Outcomes Working Group) and was supported and arranged through the outcomes data custodian (CEISS). Lastly, this study could not have been possible without the completion of significant prerequisite questionnaire standardization and data reconciliation work; work the B.C. Ministry of Advanced Education Training and Technology, and later CEISS, contracted GDA to do on province-wide student outcomes data sets collected over the past three years.

To all, we extend our heartfelt appreciation for the support provided throughout the conduct of this research project.

A special thanks goes to Timothy Maxim, for his wonderful patience while this analysis was being completed.

## Introduction

A key B.C. Council on Admissions and Transfer (BCCAT) research interest centres on examining issues related to the ease of student transfer into and within the province's post-secondary education system. The B.C. College and Institutes Student Outcomes Survey annually contacts former students one year after these students left their studies. A key goal of the survey is to assess various educational and employment outcomes. The survey also contains questions on whether or not former students transferred and where they transferred. In particular, the survey seeks to assess the degree to which respondents who transferred encountered transfer-related difficulties and to discover what problems were encountered (e.g., transcript difficulties).

In 1996, BCCAT undertook the first rigorous study of the survey information pertinent to transfer issues with a multi-year analysis of trends. This initial study also incorporated a system-wide qualitative data analysis to develop themes from the open ended question responses. The analysis<sup>2</sup> subsequently led to a number of recommended survey changes that were incorporated into the 1997 survey cycle by the Outcomes Working Group; the provincial-wide group charged with managing the survey.

This study utilises data collected from the new transfer questions incorporated into 1997 B.C. College and Institutes Student Outcomes Survey. The analysis focuses on determining:

- where respondents went for further studies:
- the nature of the transfer-related problems respondents encountered; and
- the frequency these transfer-related problems were cited.

#### **SCOPE**

The study used data from 57,973 B.C. Colleges and Institutes Student Outcomes Survey respondents collected over a three year period (1995, 1996, and 1997) and associated student records information.

Student Transfer Issues Revealed in British Columbia's Post-Secondary Education Student Outcomes Surveys: An Analysis Intended to Enhance the Survey's Future Utility, Gaylord, Ducharme & Associates (GDA), Doc 96-32 (1996e).

The annual Student Outcomes Survey, first conducted in 1987, has been jointly conducted by the B.C. College and Institute System and the B.C. Ministry of Advanced Education, Training and Technology. It is the metric used in the province to assess educational and employment outcomes for program completers and near completers one year after they exit their programs. Nineteen public institutions participated in both the 1995 and 1996 survey cycles. An additional two institutions participated in the 1997 survey cycle.<sup>3</sup>

In this study, the analysis of transfer issues was delimited to former college and institute students who attended further studies. They exited from programs either (1) designed as university transfer programs or, (2) oriented to provide "ready-to-work" skills. Throughout the remainder of this report, these two student groups are referred to as the "Arts and Sciences" student cohort or "Applied" student cohort, respectively.<sup>4</sup>

#### **OBJECTIVES REALISED**

Utilising data collected from the new transfer questions incorporated into the 1997 B.C. College and Institutes Student Outcomes Survey, the main objectives of the study- to describe the degree and form of transfer within the B.C. post-secondary education system - have been realised. In particular:

- Transfer-related data from the 1995, 1996 and 1997 Student Outcomes Surveys have been tabulated and cross-tabulated to provide information about transfer within the B.C. postsecondary system regarding the nature and extent of transfer.
- Methods of statistical inference have been applied to all cross-tabulations in order to distinguish real from possibly random differences.
- The current B.C. student outcomes survey instruments have been reviewed with the aim of identifying practical changes that will significantly improve the utility of the transfer-related data each instrument provides.

<sup>3</sup> The Open Learning Agency and the Justice Institute participated in the student outcomes survey for the first time in 1997.

A listing of 1995-97 College and Institute programs grouped under each program type is in Appendix 3.

#### **OUTLINE OF THE STUDY**

Following descriptions of the methodology and source data used in the subsequent analysis of transfer issues, an overview of the characteristics and general outcomes of the Arts and Sciences respondent cohort is made and compared with results obtained from the Applied cohort. Sub-populations within each of these two program areas are further contrasted based on the decision of whether or not to continue studies, and if continuing studies, the decision of whether or not to attempt transferring credits.

The remainder of the study addresses five key research questions:

- 1. What overall observations about the incidence and type of transfer problems encountered can be derived from the new 1997 transfer-related survey questions?
- 2. What are the reasons and factors related to the decision of some Arts and Sciences lower division respondents not to attend further studies?
- 3. What are the characteristic transfer flows within the B.C. post-secondary education system, for example, "What is the most common target institution for Arts and Sciences students leaving B.C.'s urban colleges?"
- 4. What is the incidence of, and factors related to, requests by B.C. students (Applied only and, Arts and Sciences only) to transfer credits?
- 5. What is the incidence of, and factors related to, requests by B.C. students (Applied only and, Arts and Sciences only) to transfer course credits and the problems encountered in completing this transfer?<sup>5</sup>

The first question represents an assessment of the new BCCAT-requested questions added to the 1997 student outcomes survey, while the remaining four are concerned with providing a sketch on what respondents said about their transfer experiences within B.C.'s post-secondary education system.

Throughout the study, the college or institute a student left (a year prior to the survey date) is referred to as the "Sending Institution", while the institution the student transferred to is denoted as the "Receiving Institution".

## Methodology

The analysis approach centred on employing appropriate statistical tests on selected student respondent cohort pairings in order to discover significant differences in behaviour and experiences between the pairings. Examples of cohort pairings include (A) Students That Tried to Transfer vs. Those That Did Not Try, or (B) Students That Had Transfer Problems vs. Those That Did Not. The results are presented in tables, where each factor or indicator is displayed by cohort group.

These comparisons are summarised by a derived index, which provides a "quick view" for gauging the magnitude of cohort pairing differences. The "Index" value for each indicator is the value of the first cohort group divided by the value of the second (or base) group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the first cohort group's value is greater than the base cohort group's value.

Indexes yielding a statistically significant difference between the two cohorts are grey shaded to assist in the reader's visual inspection of each table.

Formal statistical tests were carried out using either the chi-square test (for association between cross-tabulated factors) or the Student's T-test.

Some of the indicators considered in the analysis were derived from student records information supplied directly by the admissions and records offices of the Sending Institution. The remaining indicators were derived from the 1995, 1996 and 1997 Student Outcomes Survey responses. The 1997 survey instrument is included in Appendix 5.

Some indicators had to be recoded or otherwise modified in order for the cross-tabulation results to be valid (i.e., based on sufficient numbers to allow for formal statistical inference). Precise definitions for each indicator used in the analysis can be found in the Glossary (see Appendix 1).

The 1997 results are presented in the corpus. Tables for 1995, 1996 and 1997 as one group, and 1995 and 1996 individually are included in Appendix 4.

#### **IDENTIFICATION OF THE DIFFERENCES**

Realising that large amounts of numerical information are not easily assimilated, only selected comparisons that were felt to be of primary interest to the typical reader of this report have been included. In the tables that follow, an

GDA Research & Information Systems, Inc.

BCCAT

A description of the cohorts that were compared in the study is available in Appendix 2.

indicator row is shaded if a statistically significant difference exists between the cohort pairing in question.

"'Significant' in the statistical sense does not mean 'important'. It means simply 'not likely to happen by chance."" [p.361]<sup>6</sup>

When statistics are based on a sample, conclusions based on these numbers will occasionally be wrong. To avoid false conclusions that a significant difference is valid (false positive), employing a 95% confidence criterion is often sufficient. For this study, the stricter 99% confidence criterion was chosen.

A second reason for adopting this stricter standard arises from the large response rates (around three-fourths of the entire group) and subsequently larger samples that are now available for use in running these comparisons. With yearly sample sizes near 20,000 for the system, a very large proportion of the comparisons tested would be found to be "significant" using the 95% rule.

## Source Data

Data for the study was derived from the B.C. Colleges and Institutes Student Outcomes Survey and associated student records information. The survey targeted former students one year after they exited their program of studies. A total of 81,852 former students were targeted to be surveyed for the 1995, 1996 and 1997 surveys (27,469, 23,993 and 30,390 students, respectively). Of these, 57,973 students responded to the survey over this three-year period. Response rates vary by survey, with the average "combined surveys" rate being 71% (Table 1).

It should be noted that the original composition of the Arts and Sciences student cohort for the three surveys differed slightly. The 1995 survey targeted all Arts and Sciences students that had earned at least 12 credits, while the 1996 and 1997 surveys targeted Arts and Sciences students earning at least 24 credits. In order to smooth the Arts and Sciences cohort definition to a consistent standard across all three years, only students that had completed 24 or more credits were included in the study.

No adjustment had to be employed for the Applied cohort because the cohort definition was identical over the data collection period. Specifically, for the three years that data were collected, completers were defined as Lastly, students from Basic Skills programs were excluded from this study on transfer because these programs are preparatory in nature and do not, as a rule, accumulate or transfer college credit.

The respondents included in this study are presented in Table 1. Also depicted are the distributions of Arts and Sciences and Applied student respondents by survey year, along with a "combined surveys" group.

# Frequencies Distribution of Transfer Questions Added

Table 2 displays the frequencies distribution of the new questions first asked in the 1997 survey. A total of 22 indicators were derived based on the new 1997 transfer questions Q15B, Q15C, Q15D, Q15E, Q15F, and Q15G. These indicators form the basis of the subsequent cohort pairing tests discussed throughout the remainder of the study. Overall observations from Table 2 include:

 In 1997, 3,924 Arts and Sciences students attended further studies, which accounted for 73% of all Arts and Sciences student respondents (3,460 at a different institution and an additional 464 at the same institution but in a different program).

GDA Research & Information Systems, Inc.

students that had completed 75% to 100% of all program requirements for one year and two year vocational and career/technical programs.

<sup>6</sup> David S. Moore, "The Basic Practice of Statistics" (Freeman, 1995)

- Of the 3,460 Arts and Sciences students that attended further studies at a different institution, 82% (2,842) tried to transfer credits.
- 444 of the 2,842 Arts and Sciences students who tried to transfer credits experienced problems (16%).
- On average, three transfer problems were cited by student respondents.
- The number of problems experienced was more pronounced for Applied students than for Arts and Sciences students. Of the nine problems listed in the survey, Applied students cited an average of 3.75 problems, compared to 3.25 problems cited by Arts and Sciences students.
- "All Courses Were Accepted" for a quarter of Arts and Sciences students experiencing transfer problems.
- Only 1% of Arts and Sciences students who experienced transfer problems stated none of their courses transferred.
- The most common problem cited by students with transfer problems was that "Some Courses Didn't Transfer" (nine of ten Applied students and eight of ten Arts and Sciences).
- Half that experienced transfer problems stated that the "Original Courses or Program Were Not Designed for Transfer" (61% of Applied students and 45% of Arts and Sciences).

	Q15E.4	Slow or Inadequate SERVICE from NEW (Receiving) Institution	%	34%	94	275	25%	109	44
	Q15F	Attempted to Transfer Credential (or All Courses) as One Whole Block	%	74%	203	275	80%	339	42
Of Transfer Block (Q15F)	Q15G	Received All the Credits Expected For Block Transfer	%	31%	60	196	42%	141	33

The exact labeling of the questions used to derive each indicator can be found in the Glossary (see Appendix 1).

Percentages are computed as column N value (for numerator) divided by column D value (for denominator) for each indicator or question. Percentages depict the proportion of students that answered the specific question for the cohort group specified.

For questions Q15C and Q15E, students could mark all cases that applied.

- Half of the Arts and Sciences students (47%) that experienced transfer problems said that they "Received Unassigned Credit When They Expected Specific Credit" in contrast with only 38% of the Applied students that experienced transfer problems.
- One third of the Arts and Sciences students (32%) that experienced transfer problems "Had to Repeat One or More Courses that Were Already Passed" in contrast to 46% of the Applied students that experienced problems.
- Three out of four students with transfer problems attempted to transfer their original credential, or all their credits, as one whole block of credits.
- Two thirds of the students attempting to transfer their original credential, or all their credits, as one whole block of credits did not receive all the credits expected for this block transfer.
- Only one out of three students experiencing transfer problems said that they "Didn't Know or Understand the Transfer Requirements".

### Persistence and Transfer Flows in the Post-Secondary Education System

#### **PERSISTENCE**

Among the combined pool of respondents from the 1995, 1996 and 1997 surveys, 18,671 chose to continue their studies (Table 3). The proportion of 1997 Arts and Sciences students continuing their studies (at the same or a different institution) was 73%. Nearly one out of four Applied students (over 3,000 students every year) also chose to persist.

Table 3 presents the number of students who responded to the 1995, 1996 and 1997 surveys by the type of institution chosen for further studies. Notably, the Receiving Institution most often selected by Arts and Sciences students in 1997 was a B.C. university (43%) in contrast to only 4% continuing at a different University College. Only a small proportion of 1997 Arts and Sciences students attended a university outside the province (3%).

### The Arts and Sciences Lower Division Attending Further Studies Students vs. Not Attending

A closer look at the persistence of the 1997 lower division students from the Arts and Sciences programs was merited.

From Table 2, 94% of the Arts and Sciences cohort consisted of lower division students. Of these 5,047 lower division students, 3,339 (66%) attended further studies at a different institution, 427 (9%) attended further studies at the same institution, and 1,281 (25%) did not attend further studies. The cohort of 3,339 students that attended further studies was compared with the cohort of 1,281 students that did not attend further studies. The detailed results of this comparison can be found in Table 5 for 1997 respondents, and in Appendix 4 for the combined 3 year group, and the individual 1996 and 1995 groups.

Some of the statistically significant differences between the lower division Arts and Sciences students that attended further studies at a different institution (referred to as "students that attended" in the following discussion) and the lower division Arts and Sciences students that did not attend further studies (referred to as "did not attend" students in the following discussion) follow:

- Lower division Arts and Sciences students that attended further studies at a different institution were 3 years younger than those that did not continue their studies (Table 5).
- More lower division Arts and Sciences students that did not attend further studies originally enrolled for job skills reasons (e.g., improve existing job skills, learn new job skills) (34% compared to 19% for students who persisted) (Table 5).
- More than half of the lower division Arts and Sciences students that did not attend further studies exited from a University College (56% compared to 42% for students who persisted) (Table 5).
- Nearly half of the students who continued their studies exited from Urban Colleges (47%). In contrast, just a third of the students who did not continue their studies exited from Urban Colleges (33%) (Table 5).
- Students that did not attend further studies earned lower GPAs, on average, than did students that persisted (Table 5).
- No difference existed between the two cohorts in relation to the number of credits earned as reported from official transcript records; both had earned an average of 50 credits (Table 5).

- To a greater degree, students that did not attend further studies indicated that their original program workload was heavy (Table 5).
- 80% of the students who did not attend further studies were employed one year after leaving their studies, compared to 64% of the students that attended (Table 5).

The above 1997 survey results for the lower division Arts and Sciences students remain relatively constant when looking across all three years of data or when looking at the three year combined survey cohort (see Appendix 4 Tables 5.1, 5.2 and 5.3).

#### TRANSFER FLOWS

In Figure 1, the transfer flow distributions of Applied students and Arts and Sciences students are presented by receiving institution. Key observations are:

- The 1997 survey respondent cohort that attended further studies at a different institution was comprised of almost equal numbers of Applied students and Arts and Sciences students (48% and 52% respectively)
- Half of all students that attended further studies at a different institution went to a B.C. University (50%).

To All Other To BC University 18% (636) 31% (1,000) To BC Univ College 7% (240) To BC Tech Inst To BC Tech Inst 7% (241) 14% (448) From From Arts & To BC Univ College Applied Science: 12% (372) 52% (3,229)(3.460 To All Other 43% (1368) To BC University 68% (2,334)

Figure 1 1997 Transfer Flow Distributions by Receiving Institution

Table 4 provides a summary of 1997 transfer flows by programs type, type of Sending institution and type of Receiving institution. Results include:

 The most prevalent destination for Applied students from Urban Colleges and University Colleges was a B.C. University (47% and 34% respectively).

- For Applied students from Rural Colleges and Technical Institutes, the most prevalent destination was Other Institution (41% and 38% respectively).
- The most prevalent destination for Arts and Sciences students from any Sending institution was a B.C. University (77% of Urban College students, 60% of University College students, and 59% of Rural College students went to a B.C. University).

Notes.

The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

### Incidence of Transfer Requests and Associated Problems

#### **TRANSFER REQUESTS**

In the preceding section, the transfer flows of 6,689 student respondents in the 1997 survey who attended further studies at a different institution, were described in some detail. Both Sending and Receiving institution destinations were assessed in relation to the extent either Applied or Arts and Sciences students participated in each flow pattern. The next step is to look at what can be learned by taking a closer look at this group of student respondents by breaking it into one cohort comprised of those that tried to transfer credits, and another cohort comprised of those that did not try to transfer credits.

Regarding Table 6, the "Tried to Transfer" cohort was comprised of the two out of three 1997 survey student respondents who attended further studies at a different institution that tried to transfer at least some previously earned credits (4,381 students out of 6,689). The "Did Not Try" to transfer cohort was comprised of those not attempting to transfer any credits, even though they continued their studies (2,281 students out of 6,689). Some 27 students from the original group of 6,689 students failed to indicate whether or not they transferred credits, and were dropped from further inclusion.

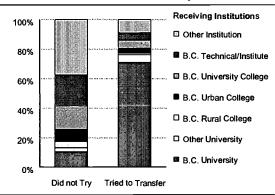

Table 6 ties to the previous section by displaying the destinations of students who continued their studies, and either tried to transfer credits or did not try to transfer credits, by Receiving institution type.

Table 6 1997 Students Attending Further Studies:
Destination of Students that Tried to Transfer
vs. Those That Did Not Try

	Did not	Tried to	No	Total
	Try	Transfer	Answer	
B.C. University	235	3,092	7	3,334
Other University	60	233		293
B.C. Rural College	93	41	2	136
B.C. Urban College	188	145	2	335
B.C. University College	356	251	5	612
B.C. Technical/Institute	467	215	7	689
Other Institution	845	392	3	1,240
No Answer	37	12	1	50
Total	2,281	4,381	27	6,689

Figure 5 further illustrates the differences between students that tried to transfer and those that did not try, by Receiving institution type. The number one destination for students that tried to transfer was a B.C. University. For students that did not try to transfer credits, however, Other Institution (comprised of independent institutions) was the destination of first choice. In fact, very little similarity existed between the behaviour of the two cohorts regarding any Receiving institution category.

Figure 4 1997 Students Attending Further Studies: Destination of Students that Tried to Transfer vs. Those That Did Not Try

Note:

Examples of 'Other Institution' are: Academy of Learning and Certified General Accountants Association of B.C.

#### <u>Tried to Transfer Credits vs. Did Not Try When</u> Attending Further Studies at a Different Institution

A final drill down into the cohort of student respondents in the 1997 survey who attended further studies at a different institution, is accomplished by bifurcating the "Tried to Transfer" and "Did Not Try" to transfer credit cohorts by program type; namely by an Applied student cohort and an Arts and Sciences student cohort. Once done, the behaviour regarding the attempt to transfer credits is seen to be very different between the Applied and the Arts and Sciences cohorts. As shown in Table 7, eight of ten Arts and Sciences students tried to transfer, while only five of ten Applied students did likewise.

Table 7 1997 Students Attending Further Studies: Students that Tried to Transfer vs. Those That Did Not Try by Program Type

	Did not Try	Tried to Transfer	No Answer	Total
Arts And Sciences	612	2,842	6	3,460
Applied	1,669	1,539	21	3,229
Total	2,281	4,381	27	6,689

GDA Research & Information Systems, Inc.

To summarise, within the population of students attending further studies at a different institution, the students that tried to transfer were compared to those that did not try. The comparisons crafted were done by the two program types (Applied; and Arts and Sciences) for the following years of data observed: 1997, 1996; 1995, and the three years grouped together.

Table 8 and Table 9 present the results of the comparisons for the 1997 Applied student cohort and the 1997 Arts and Sciences cohort, respectively. The results for the 1996 and 1995 survey years for both cohorts are included in Appendix 4. From the 1997 tables, the following statistically significant differences were observed:

- For the cohort of Applied students continuing their studies, those that tried to transfer credits were significantly younger than those that did not try to transfer credits (Table 8). This pattern was mirrored for the Arts and Sciences student cohort (Table 9). The gap in age was more pronounced for Applied students than for the Arts and Sciences students (greater than 3.5 years and less than 1.9 years respectively).
- A greater proportion of Arts and Sciences students who continued their studies and transferred credits, went to a B.C. University (79%), than did those that continued their studies and didn't transfer credits (14%) (Table 9). Although the incidence level was somewhat lower, this B.C. University attendance pattern was repeated for the Applied student cohort (55% of those that transferred credits went to a BC University versus 9% that did not transfer credits) (Table 8).
- A greater proportion of Arts and Sciences students who continued their studies and did not transfer credits, went to either an independent institution, a B.C. Technical Institute, or a B.C. University College (31%, 23%, and 19% respectively), than did those that continued their studies and transferred credits (4% to each Receiving institution type) (Table 9). Once again, this destination pattern was repeated for the Applied student cohort (40% versus 19% to independent institutions, 20% versus 7% to B.C. Technical Institutes, and 15% versus 8% to B.C. University Colleges) (Table 8).
- Regardless of whether a student was from the Applied or the Arts and Sciences cohorts, a significantly greater proportion of students that did not try to transfer credits cited that they originally enrolled in their Sending institution program to get job skills than did students that transferred credits. In this case, however, the magnitudes were markedly

different (31% vs. 16% for Arts and Sciences programs, 65% vs. 44% for Applied) (Table 8 and Table 9).

Figure 5 and Figure 6 summarise the GPA distribution differences between attending further studies students that tried to transfer credits and those that did not, for Arts and Sciences and Applied student cohorts, respectively (Table 8 and Table 9).

Figure 5 1997 GPA Distribution of Attending Further Studies Arts and Sciences Students that Tried to Transfer Credits

Notes.

The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

#### **TRANSFER PROBLEMS**

#### Encountered Problems vs. Had No Problems When Attempting to Transfer Credits

Of the 4,381 student respondents in the 1997 survey that attempted to transfer credits, 724 (17%) experienced transfer problems (280 students from Applied programs and 444 from Arts and Sciences programs). Although the majority of students that experienced transfer problems originally exited from Arts and Sciences programs (61%), a slightly greater proportion of Applied students experienced transfer problems (18% versus 16%) (Figure 7).

Figure 7 1997 Distribution of the Incidence of Transfer Problems by Program Type

Note:

39 students did not answer the survey question "Experienced Transfer Problems" and were excluded from further analysis.

As previously noted in Table 2, the number of transfer problems experienced by students averaged more than 3. Table 10 and Figure 8 present the distribution of all problems by Receiving institution.

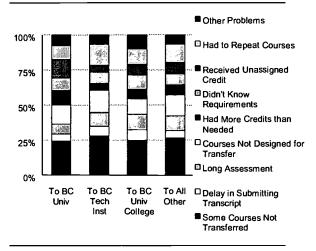

Table 10 Number of 1997 Transfer Problems Cited by Students that Had Problems by Receiving Institution

In concordance with the most important destination of transfer students, more than two thirds of all transfer problems were related to transferning to a B.C. University (71%). The Receiving institution type with the smallest ratio of problems per student, was the University College category with an average of 3.5 problems cited per student compared to 4 problems per student for all other Receiving institution types (Table 10).

As illustrated in Figure 8, the relative proportions of each transfer problem were not significantly different across the various Receiving institution types.

Figure 8 1997 Type of Transfer Problems Cited by Students that Had Problems by Receiving Institution

The next question, "To what extent did Applied students who transferred credits experience problems differently, based on the program they transferred into?" is addressed in Table 11 and Figure 9.

Table 11 1997 Applied Students that Tried to Transfer Credits by Program Area of Further Studies and by Number of Transfer Problems

GDA Research & Information Systems, Inc.

The Visual, Fine Arts and Communication Applied program area had the highest proportion of students citing at least one problem (32%). This program area also exhibited the highest proportion of students citing four or more problems (18%) (Figure 9).

Figure 9 1997 Distribution of Applied Students that Tried to Transfer Credits by Program Area of Further Studies and by Number of Transfer Problems

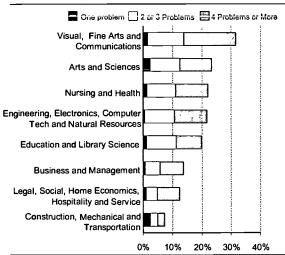

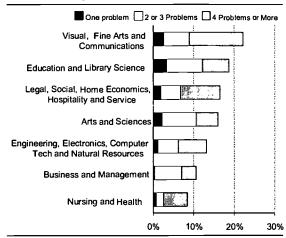

Table 12 and Figure 10 address the question, "To what extent did Arts and Sciences students who transferred credits experience problems differently, based on the program they transferred into?" Here, findings parallel the Applied cohort results for the Visual, Fine Arts and Communication program area, which again had the highest proportion of students experiencing problems (23%). By comparison, the Nursing and Health area yielded a markedly lower proportion citing problems than the Applied cohort.

Figure 10 Distribution of

Arts and Sciences Students that Tried to Transfer Credits
by Program Area of Further Studies and
by Number of Transfer Problems

Within the population of students attempting to transfer credits, two student groups were compared: those that experienced transfer problems versus those that did not. Comparisons were further bifurcated by program type (Applied students versus Arts and Sciences). Similar comparisons were done for the three year combined data set and the 1995, 1996 and 1997 survey data sets individually. Pre-1997 results are presented in Appendix 4. Results for 1997 are presented in Table 13 for the cohort of students who had originally exited from Applied programs, and in Table 14 for the cohort of students who had originally exited from Arts and Sciences programs. Statistically significant differences include:

- For either cohort, Overall Satisfaction with Studies was better for students who did not experience transfer problems compared to those who did (Table 13 and Table 14).
- For either cohort, a greater proportion of students who experienced transfer problems went to Out-of-BC Universities, than did students who cited no transfer problems (Table 13 and Table 14).
- For either cohort, students who experienced transfer problems stated they were less prepared for further studies than students who did not experience transfer problems (Table 13 and Table 14).
- Generally, students encountering problems were not as satisfied with their college experiences and resultant skill development as were their no-transferproblem counterparts (index values < 1).</li>

Notes.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the night cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

### Block Transfer and Had Transfer Problems vs. Non-Block Transfer and Had Transfer Problems

Of the 724 students in the 1997 survey who had tried to transfer credits and experienced transfer-related problems, 701 answered the follow-up question "Did you attempt to transfer your original credential (or all completed coursework), as one whole block of credits towards your new (current) program (or field of study)". Over 77% (542) of these students answered "yes". In other words, the overwhelming majority of students who reported having transfer problems, encountered these problems while attempting to transfer one whole block of credits.

The distribution of responses to the question regarding the attempt to block transfer, depicted in Figure 11, was first split between students who had transfer problems and originally exited from either Applied programs or Arts and Sciences programs. These two program area cohorts were further divided between students who had transfer problems and had tried to transfer their original credential (or all completed course-work) as one whole block, and those that did not.

Figure 11 1997 Students with Transfer Problems by Program Type and Block Transfer vs. Non-Block Transfer

Note:

Of the 724 students who "Experienced Transfer Problems", 23 did not answer the question "Attempted to Transfer Credential (or All Course Credits) as One Whole Block", and were excluded from further analysis.

As highlighted previously in Table 2, the observation can be made that only 31% of the students who had (a) exited from Applied programs, (b) experienced transfer problems, and (c) attempted to transfer the original credential as one whole block, received all the credits expected. For similarly defined Arts and Sciences students, that proportion rises to 42%.

Table 15 and Figure 12 address the question, "To what extent did former Arts and Sciences students who transferred one whole block of credits experience problems differently, based on whether or not they attempted to transfer their original credential or all completed course-work as one whole block?"

Table 15 1997 Incidence of Problems:

Other Problems 24% 83 339 22% 19 87
Delay in Submitting Transcript 18% 60 337 16% 14 86

The most common transfer problem for students was the fact that some courses were not transferred: this being true for an average of four out of five students. The relative proportions of the block transfer cohort and its non-block transfer counterpart that cited each particular transfer problem were remarkable in that very little variance was observed between the two populations. Only one transfer problem, "Had Completed More Credits than Was Allowed to Transfer", produced any notable difference between block and non-block Arts and Sciences cohorts (32% and 22%, respectively) (Figure 12).

Figure 12 1997 Incidence of Problems: Arts and Sciences Students Transferring Whole Block vs. Arts and Sciences Students Not Transferring Whole Block

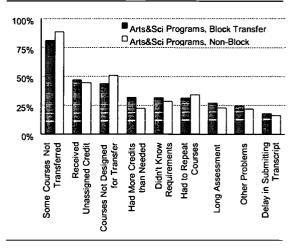

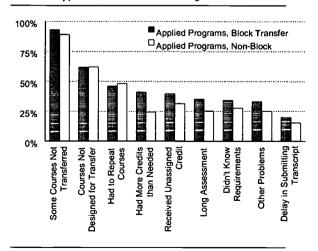

Table 16 and Figure 13 address the question, "To what extent did former Applied program students who transferred one whole block of credits experience problems differently, based on whether or not they attempted to transfer their original credential or all completed course-work as one whole block?"

Table 16 1997 Incidence of Problems:
Applied Students Transferring Whole Block
vs. Applied Students Not Transferring Whole Block

	Applied Programs, Block Transfer			Non-Block			
	%	N	D	%	N	D	
Some Courses Not Transferred	93%	187	201	89%	64	72	
Courses Not Designed for Transfer	61%	118	192	62%	42	68	
Had to Repeat Courses	46%	92	200	48%	34	71	
Had More Credits than Needed	41%	78	191	24%	17	70	
Received Unassigned Credit	40%	73	184	31%	21	67	
Long Assessment	35%	69	196	25%	18	72	
Didn't Know Requirements	34%	65	190	28%	19	69	
Other Problems	33%	67	203	25%	18	72	
Defay in Submitting Transcript	20%	40	201	15%	11	72	

As was found for the Arts and Sciences cohort, the most common transfer problem for Applied students was the fact that some courses were not transferred: this being true for an average of nine out of ten students. The lack of variance between the degree block transfer and the non-block transfer cohorts cited each transfer problem paralleled previous results. Again, "Had Completed More Credits than Was Allowed to Transfer", produced the only notable difference between the Applied student cohorts (41% and 24%, respectively) (Figure 13).

Figure 13 1997 Incidence of Problems: Applied Students Transferring Whole Block vs. Applied Students Not Transferring Whole Block

To summarise, within the population of students experiencing transfer problems, two groups were compared: the block transfer students experiencing transfer problems and the non-block transfer students experiencing transfer problems. Comparisons between these two cohorts were done within the two program types used throughout the study: the Applied Program type, and the Arts and Sciences Program type.

Detailed survey results for all the indicators were restricted to the 1997 data set, and are presented in Table 17 for the cohort of students who had originally exited from Applied Programs, and in Table 18 for the cohort of students who had originally exited from Arts and Sciences Programs.

For the 1997 data set, a number of large index value differences existed in the type of transfer problems experienced between those that attempted to transfer their original credential as one whole block of credits, and those that did not. However, few of the differences proved statistically significant because of the small sample size of the non-block cohort. For the group of students who continued their studies but encountered one or more transfer-related problem, statistically significant differences were limited to the following:

- For either the Applied or the Arts and Sciences cohort, the "Relationship Between Past and Further Studies" was stronger for students who attempted to transfer their original credential or all their completed course-work as one whole block, than it was for those that did not attempt to block transfer. For both the Arts and Sciences cohort and the Applied cohort, it is a factor of about 10% better (index values of 1.09 and 1.13, respectively) (Table 17 and Table 18).
- The "Extent to Which Transfer Was a Problem" was greater for the block transfer Applied student cohort than it was for the non-block transfer Applied student cohort (index value of 1.18) (Table 17).
- The "Number of Transfer Problems Experienced" was greater for the block transfer Applied student cohort than it was for the non-block transfer Applied student cohort (index value of 1.15) (Table 17).

Notes.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>\*</sup> Relatively small sample size, interpret result with caution.

### Encountered Transfer Problems Only at the Old Institution vs. Problems Only at the New Institution

Of the 724 students in the 1997 survey who had tried to transfer credits and experienced at least one transfer-related problem, 697 provided an indication of whether the problems encountered originated at the Old (Sending) and/or the New (Receiving) institution. For 21% of these students, problems were encountered at both the Old and New institutions. Table 19 presents the incidence of the problems cited.

Table 19 1997 Incidence of Problems:
Students Experiencing Problems at Old vs. at New Institution

	No Problem at New Institution	Slow Service New	Poor Advice New	Both Problem Types at New	No Answer	Grand Total
No Problem at Old Institution	213	26	62	83	2	386
Slow Service Old Poor Advice	21	10	7	11	0	49
Old Both Problem	103	8	32	27	0	170
Types at Old No Answer	46 7	8 2	21 3	23 5	0 4	98 21
Grand Total	390	54	125	149	6	724

Within the population of students experiencing transfer problems, two groups were compared: the 170 students experiencing transfer problems (Slow Service and/or Poor Advice) only at the Old institution, versus the 171 students experiencing transfer problems (Slow Service and/or Poor Advice) only at the New institution. Indicator comparisons were restricted to the 1997 data set.

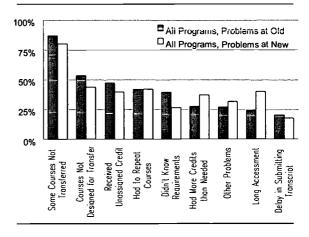

Table 20 and Figure 14 contrast the incidence of problems experienced only at Old institutions with problems experienced only at New institutions.

Table 20 1997 Incidence of Problems: Students Experiencing Problems Only at Old vs. Only at New Institution

	-	All Prog	rams,	All Programs				
	Pro	Problems at Old		<u>Problems</u>		t New		
	%	N	D	%	N	D		
Some Courses Did Not Transfer	87%	148	170	80%	134	170		
Courses Not Designed for Transfer	53%	86	161	44%	71	161		
Received Unassigned Credit	47%	76	161	40%	63	161		
Had to Repeat Courses	42%	71	169	42%	70	169		
Didn't Know Requirements	40%	65	164	27%	43	164		
Had More Credits than Needed	28%	46	166	37%	61	166		
Other Problems	27%	46	170	32%	54	170		
Long Assessment	24%	40	164	40%	66	164		
Delay in Submitting Transcript	20%	34	168	18%	30	168		

For either cohort, the transfer problem cited most often was the fact that some courses didn't transfer. A higher proportion of students citing problems at the Old institution said that they didn't know the requirements, than did students citing problems at the New institution (40% and 27%) (Table 20).

Figure 14 1997 Incidence of Problems: Students Experiencing Problems at Old vs. New Institution

Detailed indicator results for all programs are presented in Table 21. Drilldown analyses by program type were not produced due to the small program type sample sizes involved. Nevertheless, a number of significant differences were revealed:

- The majority of students experiencing Slow Service and Poor Advice only at an Old institution, originally exited from Arts and Sciences programs (75% contrasted with 50% of those that had Slow Service and Poor Advice only at a New institution (Table 21).
- A higher proportion of students experiencing problems only at a New institution had previously completed a certificate, degree or diploma (18% contrasted with 5% of those with problems only at an Old institution) (Table 21).
- A higher percentage of students experiencing problems only at a New institution completed the requirements for their program credential, compared to those who experienced problems only at an Old institution (48% vs. 30%).
- Students with problems only at an Old institution had lower average GPAs than students experiencing problems only at a New institution (index value of 0.92) (Table 21).

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

n/a Not applicable or any value smaller than 3%.

# Summary and Conclusions

This analysis of transfer issues was delimited to former college and institute students who attended further studies. These students exited from programs either (1) designed as university transfer programs or, (2) oriented to provide "ready-to-work" skills. These two "major program type" student groups were the principal "within group" assessment cohorts used throughout the analysis, and are referred to as the "Arts and Sciences" student cohort and the "Applied" student cohort, respectively.

The following five sub-cohort pairings, defined within each of the two major program type cohorts, were analysed in order to discover significant differences in transfer-related behaviour and experience from the 1997 student outcomes survey:

Sub-Cohort 1: comparing students who continued studies with those who did not;

**Sub-Cohort 2:** for students who continued studies: comparing students who attempted to transfer credits with those who did not;

**Sub-Cohort 3:** for students who continued studies and attempted to transfer credits: comparing students who encountered transfer problems with those who did not;

Sub-Cohort 4: for students who continued studies, attempted to transfer credits, and encountered transfer problems: comparing students who attempted to transfer the original credential (or all completed course-work) as one whole block of credits towards their new program with those who did not; and

**Sub-Cohort 5:** for students who continued studies, attempted to transfer credits, and encountered transfer problems: comparing students who encountered transfer problems only at the old institution (Sending) with those who encountered transfer problems only at the new institution (Receiving).

A total of 181 indicators were initially developed for formal statistical testing. All were derived from either student records supplied directly by the admissions and records offices of the Sending institution, or from the 1995, 1996 and 1997 student outcomes survey responses. The analysis approach centred on employing appropriate statistical tests on 143 of the most promising indicators to discover significant differences between each sub-cohort pairing. Formal statistical tests were carried out using

either the chi-square test (for association between cross-tabulated factors) or the Student's T-test.

#### **KEY FINDINGS:**

- The cohort of students who attended further studies at a different institution was comprised of almost equal numbers of former college and institute Applied program students and Arts and Sciences students (48% and 52% respectively). However, proportionately more of the Arts and Sciences cohort attended further studies (64% compared to 24% for the Applied cohort).
- 3,924 former Arts and Sciences students attended further studies, which accounted for 73% of all Arts and Sciences survey respondents (3,460 at a different institution and an additional 464 at the same institution but in a different program).
- The most prevalent destination for former Applied students from Urban Colleges and University Colleges was a B.C. University (47% and 34% respectively).
- For Applied students from Rural Colleges and Technical Institutes, the most prevalent destination was Other Institution (41% and 38% respectively).
- The most prevalent destination for Arts and Sciences students from any Sending institution was a B.C. University (77% of Urban College students, 60% of University College students, and 59% of Rural College students went to a B.C. University).
- Of the 3,460 former Arts and Sciences students who attended further studies at a different institution, 82% (2,842) tried to transfer credits.
- 444 of the 2,842 Arts and Sciences students who tried to transfer credits experienced problems (16%).
- **280** of the 1,539 Applied students who tried to transfer credits experienced problems (18%).

#### **KEY FINDINGS BY SUB-COHORT:**

Lower Division Arts and Sciences Students Who Continued Studies versus Those Who Did Not (Sull-Cohort 1)

- Students who attended further studies at a different institution were 3 years younger than those that did not continue their studies.
- More students who did not attend further studies originally enrolled for job skills reasons (e.g., improve existing job skills, learn new job skills) (34% compared to 19% for students who persisted).

GDA Research & Information Systems, Inc.

<sup>7</sup> A listing of 1995-97 College and Institute programs grouped under each program type can be found in Appendix 3.

- More than half of the students who did not attend further studies exited from a University College (56% compared to 42% for students who persisted).
- Nearly half of the students who continued their studies exited from Urban Colleges (47%). In contrast, just a third of the students who did not continue their studies exited from Urban Colleges (33%).
- Students who did not attend further studies earned lower GPAs, on average, than did students who persisted.
- No difference existed between the two cohorts in relation to the number of credits earned, as reported from official transcript records. Both had earned an average of 50 credits.
- To a greater degree, students who did not attend further studies indicated that their original program workload was heavy.
- 80% of the students who did not attend further studies were employed one year after leaving their studies, compared to 64% of the students who continued their studies.

# Students Who Attempted to Transfer Credits versus Those Who Did Not (of students who continued studies) (Sul-Cohort 2)

- For the cohort of Applied students continuing their studies, those that tried to transfer credits were significantly younger than those that did not try to transfer credits. This pattern was mirrored for the Arts and Sciences student cohort. The gap in age was more pronounced for Applied students than for the Arts and Sciences students (greater than 3.5 years and less than 1.9 years respectively).
- A greater proportion of Arts and Sciences students who continued their studies and transferred credits, went to a B.C. University (79%), than did those that continued their studies and didn't transfer credits (14%). Although the magnitude was lower, this B.C. University attendance pattern was repeated for the Applied student cohort (55% of those that transferred credits went to a BC University versus 9% that did not transfer credits).
- A greater proportion of Arts and Sciences students who continued their studies and did not transfer credits, went to either an independent institution, a B.C. Technical Institute, or a B.C. University College (31%, 23%, and 19% respectively), than did those who continued their studies and transferred credits (4% to each Receiving institution type). Once again, this destination pattern was repeated for the Applied student cohort (40% versus 19% to independent

- institutions, 20% versus 7% to B.C. Technical Institutes, and 15% versus 8% to B.C. University Colleges).
- In light of the preceding two observations, it can be argued that destination (Receiving) institution patterns depended significantly more on whether or not the act of transferring credit occurred than it did on the Applied versus Arts and Sciences program area students exited from originally.
- Another pattern that was similar for both the Applied and the Arts and Sciences cohorts was that a significantly greater proportion of students who did not try to transfer credits cited that they originally enrolled in their Sending institution program to get job skills than did students who transferred credits. In this case, however, the magnitudes were markedly different (31% vs. 16% for Arts and Sciences programs, 65% vs. 44% for Applied).

# Students Who Encountered Transfer Problems versus Those Who Did Not (of students who continued studies and attempted to transfer credits) (Sub-Cohort 3)

- Of the 4,381 student respondents in the 1997 survey that attempted to transfer credits, 724 (17%) experienced transfer problems (280 students from Applied programs and 444 from Arts and Sciences).
- Nearly half (48%) of the students cited that one of the transfer-related problems they encountered was the courses or original program were not designed for transfer.
- Although the majority of students that experienced transfer problems originally exited from Arts and Sciences programs (61%), a slightly greater proportion of Applied students experienced transfer problems (18% versus 16%).
- In concordance with the most important destination of transfer students, more than two thirds of all transfer problems were related to transferring to a B.C. University (71%).
- The Receiving institution type with the smallest ratio
  of problems per student, was the University College
  category with an average of 3.5 problems cited per
  student. In contrast, 4 problems were cited per
  student attending all other institution types.
- The Visual, Fine Arts and Communication Applied program area had the highest proportion of students citing at least one problem (32%). This program area also exhibited the highest proportion of students citing four or more problems (18%).
- The Arts and Sciences students in Visual, Fine Arts and Communication program area also had the

highest proportion of students experiencing problems (23%). By comparison, Arts and Sciences students in the Nursing and Health area yielded a markedly lower proportion citing problems than did Applied students in this same area (8% versus 22%).

- For either cohort, Overall Satisfaction with Studies was better for students who did not experience transfer problems compared to those who did.
- For either cohort, a greater proportion of students who experienced transfer problems went to Out-of-BC Universities, than did students who cited no transfer problems.
- For either cohort, students who experienced transfer problems stated they were less prepared for further studies than did students who did not experience transfer problems.
- Generally, students encountering problems were not as satisfied with their college experiences and resultant skill development as were their no-transferproblem counterparts (index values < 1).</li>

Students Who Attempted to Transfer the Original Credential (or all completed course-work) as One Whole Block of Credits Towards Their New Program versus Those Who Did Not (of students who continued studies, attempted to transfer credits, and encountered transfer problems) (Sub-Cohort 4)

- Of the 724 students in the survey who had tried to transfer credits and experienced transfer-related problems, 701 answered the follow-up question "Did you attempt to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study)". Over 77% (542) of these students answered "yes". In other words, the overwhelming majority of students who reported having transfer problems, encountered these problems while attempting to transfer one whole block of credits.
- For four out of five students, most common transfer problem was that some courses were not transferred. The relative proportions of the block transfer cohort and its non-block transfer counterpart that cited each particular transfer problem were remarkable in that very little variance was observed between the two populations. Only one transfer problem, "Had Completed More Credits than Was Allowed to Transfer", produced any notable difference between block and non-block Arts and Sciences cohorts (32% and 22%, respectively).
- As was found for the Arts and Sciences cohort, the most common transfer problem for Applied students was the fact that some courses were not transferred: this being true for an average of nine out of ten

- students. The lack of variance between the degree block transfer and the non-block transfer cohorts cited each transfer problem paralleled previous results. Again, "Had Completed More Credits than Was Allowed to Transfer", produced the only notable difference between the Applied student cohorts (41% and 24%, respectively).
- For either the Applied or the Arts and Sciences cohort, the "Relationship Between Past and Further Studies" was stronger for students who attempted to transfer their original credential or all their completed course-work as one whole block, than it was for those who did not attempt to block transfer. For both the Arts and Sciences cohort and the Applied cohort, it is a factor of about 10% better (index values of 1.09 and 1.13, respectively).
- The "Extent to Which Transfer Was a Problem" was greater for the block transfer Applied student cohort than it was for the non-block transfer Applied student cohort (index of 1.18).
- The "Number of Transfer Problems Experienced" was greater for the block transfer Applied student cohort than it was for the non-block transfer Applied student cohort (index value of 1.15).

Students who encountered transfer problems only at the old institution (Sending) versus those who encountered transfer problems only at the new institution (Receiving) (of students who continued studies, attempted to transfer credits, and encountered transfer problems) (Sub-Cohort 5)

- For either cohort, the transfer problem cited most often was the fact that some courses didn't transfer.
   A higher proportion of students citing problems at the Old institution said they didn't know the requirements, than did students citing problems at the New institution (40% and 27%).
- The majority of students experiencing Slow Service and Poor Advice only at an Old institution, originally exited from Arts and Sciences programs (75% contrasted with 50% of those that had Slow Service and Poor Advice only at a New institution.
- A higher proportion of students experiencing problems only at a New institution had previously completed a certificate, degree or diploma (18% contrasted with 5% of those with problems only at an Old institution).
- A higher percentage of students experiencing problems only at a New institution completed the requirements for their program credential, compared to those who experienced problems only at an Old institution (48% vs. 30%).

 Students with problems only at an Old institution had lower average GPAs than students experiencing problems only at a New institution (index of 0.92).

Results for the 1995, 1996, and the three-year 1995-97 combined groups are contained in Appendix 4.

#### SURVEY INSTRUMENT RECOMMENDATIONS

1997 was the first data collection cycle of the college and institute student outcomes survey that included the new transfer-related questions based on the first phase research of this project. Based on the data collected, the following four questionnaire refinements are offered:

**Recommendation 1:** Add a Question to Help Identify the 'Most Problematic' Transfer Problem.

Not knowing the magnitude of the transfer problems cited by each student surveyed, resulted in not being to assess which problems were the most important. An indication of which problem was the most important, can be derived by adding the following question: "Which one of the transfer problems you experienced had the greatest negative impact on your transfer request?"

Recommendation 2: Modify the Questionnaire Skip Patterns to Capture Appropriate Transfer Problem Information From All Students Who Attended Further Studies.

The following two "transfer problems questions" should be asked to all students who attended further studies (Q10=Yes), not only to those that indicated they had problems:

Q15B "How many courses, if any, did you NOT receive credit for?" would become for those that did not have problems: "How many courses, if any, did you receive credit for?" and

Q15F "Did you attempt to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study)".

Recommendation 3: Modify Question 15F, "Did you Attempt to Transfer Your Original Credential (or All Completed Course-work), as One Whole Block of Credits Towards Your New (Current) Program (or Field of Study), did you Receive All Credits You Expected?", so as to Better Capture FORMAL Block Transfer Students.

Although the data collected via this question as stated was valuable, the original intention was to elicit a response from just those students who had transferred credit under a formal "block transfer" agreement. Such agreements abound in the BC post-secondary system, where they normally specify that students who have completed a diploma in an applied discipline can be granted two years of credit towards a specific degree at a receiving institution. Such agreements normally do not involve establishing equivalency or granting credit for individual

courses. An analysis of student responses to this question indicates that many students appeared to have interpreted the wording to mean "did you transfer all your credits at the same time?" This is indicated clearly by the fact that the most common problem cited by this sub-cohort was that "some courses were not transferred." Under most formal block transfer agreements, courses either do not transfer individually, or are guaranteed "unassigned" credit. To better capture these data, students who completed a credential (diploma or certificate or associate degree) should be asked this modification of question 15F: "Did you attempt to transfer your completed credential for one or two years of credit, rather than transferring all your courses individually?"

Recommendation 4: If any Transfer Questions Need to be Eliminated Because of Questionnaire Length, Those Related to Origin of the Problem Being at the Old or New Institution Should be the First Considered.

This analysis has shown that not a great deal of information could be derived from the 1997 survey respondents for this set of questions (Q15E1 through Q15E4). The current "mark all that apply" directive does not enable the identification of the worst/greatest negative impact.

#### **FURTHER STUDY RECOMMENDATIONS**

- Incorporate (LINK) presently disparate administrative data from university admissions and records systems, with both university and college/institute student survey records.
- 2. Conduct an analysis focusing on the full-time or parttime status of students.
- Once the 1998 college and institute outcomes data are available, combine the 1997 with the 1998 data sample and conduct a Program/ Discipline-based cohort analysis of transfer-related issues.
- 4. Conduct an analysis on the persistence of students exiting the subset of programs designed to offer only the first two years of an integrated four-year program that require the student to transfer to a University to complete the degree.
- Utilise the 4th year of college and institute student outcomes data in 1998 to conduct regression tests to assess indicator trends.
- Conduct an enhanced longitudinal tracking study to specifically assess the transfer-related issues of Stop-Outs.
- 7. To complement this student perspective analysis of transfer issues, conduct Focus Groups involving admissions / other transfer articulation groups at the colleges and universities to derive the "administrative perspective."

Visual, Fine Arts and Communications	%		Information from Administrative Records
Female	%		Information from Administrative Records
Age at Time of Survey (Years)	Average	<b></b>	Information from Administrative Records
Age <21	%		Information from Administrative Records
Age <23, >=21	%		Information from Administrative Records
Age <25, >=23	%		Information from Administrative Records
Age >=25	%	<b></b>	Information from Administrative Records
Aboriginal Only	%	Q56	Are you an aboriginal person?
Visible Minority	%	<b>}</b>	Are you, because of your race or colour, in a visible minority group in Canada?
			Are you an aboriginal person?
Previously Completed High School	%	Q07	(On a different subject now) Before enrolling at [Name of
			institution], did you complete secondary (high) school?
Previously Completed Certificate or Diploma	%	Q09B_1 , Q09B_2	Which diplomas did you obtained before attending [Name of institution]? [Mark all that apply] Certificate (<2 years of courses);
			Diploma (2 years or more of courses)
Previously Completed Degree (University)	%	Q09B_3	Which diplomas did you obtained before attending [Name of institution]? [Mark all that apply] Degree (university degree)
Previously Completed Certificate, Diploma or Degree	<b>%</b>	Q09B_1, Q09B_2, Q09B_3	Which diplomas did you obtained before attending [Name of institution]? [Mark all that apply] Certificate (<2 years of courses); Diploma (2 years or more of courses) Degree (university degree)
Had Current Job Before/During Studies	%	Q25A	Did you have the same employment before or while you were attending [Name of Institution]?
Related Work Experience Before/During	%	Q42	Before studying at [Name of institution], did you have any work experience which is related to your current job?
Completed Requirements for Program Credential	%	Q47	When you left [Name of institution], had you completed the requirements for a credential such as a degree, diploma, or certificate? (Completing high school or equivalent is a credential for ABE students)
In a Cooperative Education Program (Student's Declaration Only)	%	Q50B	Were you in a cooperative education program?
In a Cooperative Education Program (Student & MoEST Declaration)	%	Q50B	Were you in a cooperative education program?

Indicator		Question Number	Question or Derivation Mechanism
Job Skills	%	Q44	To what extent did you meet your most important reason for enrolling? Would you say it was to
Degree Attainment	%	Q44	improve existing job skills, learn new job skills  To what extent did you meet your most important reason for enrolling? Would you say it was to
Degree Attainment and Job Skills	%	Q44	To what extent did you meet your most important reason for enrolling? Would you say it was_
Other Reason	%	Q44	To what extent did you meet your most important reason for enrolling? Would you say it was_
Completed All the Credits I Could	%	Q48_1	What was your main reason for leaving [Name of institution] when you did? [Mark all that apply] Completed program / completed all the credits I could
Changed Mind about Program/Job Goal	%	Q48_2	What was your main reason for leaving [Name of institution] when you did? [Mark all that apply] Changed mind about program / job goals or plans changed
Transferred to/Qualified for Admission	%	Q48_3	What was your main reason for leaving [Name of institution] when you did? (mark all that apply) :transferred to / qualified for admission at other institution
Disappointed With Program	%	Q48_4	What was your main reason for leaving [Name of institution] when you did? [Mark all that apply] Disappointed with program or college/institute
Disappointed With Own Performance	%	Q48_5	What was your main reason for leaving [Name of institution] when you did? (mark all that apply) :disappointed with own performance / failed program
Got a Job	%	Q48_6	What was your main reason for leaving [Name of institution] when you did? [Mark all that apply] Got a job / decided to work
Job Situation Changed	%	Q48_7	What was your main reason for leaving [Name of institution] when you did? (mark all that apply): job situation changed
Convenience (e.g. Transportation, Scheduling)	%	Q48_8	What was your main reason for leaving [Name of institution] when you did? (mark all that apply) :convenience (e.g. transportation, scheduling)
Personal Circumstances	%	Q48_9	What was your main reason for leaving [Name of institution] when you did? (mark all that apply) :personal circumstances (e.g. health, family)
Reasons for Leaving: Other	%	Q48_10	What was your main reason for leaving [Name of institution] when you did? [Mark all that apply] [Other specify]
Main Reason for Enrolling Met	Scale 4-1	Q45	To what extent did you meet your most important reason for enrolling? Would you say it was_
Overall Satisfaction with Studies	Scale 4-1	Q49	How satisfied were you with your studies at [Name of institution]? would you say you were
Attended Further Studies	%	Q10 , Q01, Q03,Q04B	Since you took your last course at [Name of institution], have you taken any further studies?
Currently Studying	%	Q09E , Q06	Are you presently taking any other education/training?
From Technical/Institute (Sending)	%		B.C. Institute of Technology, Nicola Valley Institute of Technology, Vancouver Community College, Justice Institute, Emily Carr Institute of Arts and Design
From University College (Sending)	%		University College of the Cariboo, University College of the Fraser Valley, Kwantlen University College, Malaspina University-College, Okanagan University College, Open Learning Agency
From Urban College (Sending)	%		Camosun College, Capilano College, Douglas College, Langara College
From Rural College (Sending)	%		College of New Caledonia, College of the Rockies, North Island College, Northern Lights College, Northwest Community College, Selkirk College
GPA	Average	,	The student's grade point average just prior to transfer-ring to the Receiving Institution. Information from Administrative Records
GPA <=2.4	%		Information from Administrative Records
GPA >2.4, <=2.7	%		Information from Administrative Records
GPA >2.7, <=3.1	%		Information from Administrative Records
GPA >3.1	%		Information from Administrative Records
Credits	Average		The total number of post-secondary credits the students had accumulated at the Sending Institution before transferring to the Receiving Institution. Information from Administrative Records
Credits <=3	%		Information from Administrative Records

Indicator		0	Constitution Decision and Constitution of the
Indicator		Question Number	Question or Derivation Mechanism
Credits >12, <=24	%		Information from Administrative Records
Credits >24, <=36	%		Information from Administrative Records
Credits >36, <=60	%		Information from Administrative Records
Credits >60	%		Information from Administrative Records
To B.C. Technical/Institute (Receiving)	%		B.C. Institute of Technology, Nicola Valley Institute of Technology, Vancouver Community College, Justice Institute, Emily Carr Institute of Arts and Design
To B.C. University College (Receiving)	%		University College of the Cariboo, University College of the Fraser Valley, Kwantlen University College, Malaspina University-College, Okanagan University College, Open Learning Agency

To B.C. Rural College (Receiving)	%		College of New Caledonia, College of the Rockies, North Island College, Northem Lights College, Northwest Community College, Selkirk College
To B.C. University (Receiving)	%		SFU, UBC, U.VIC, or UNBC
To Out or B.C. University (Receiving)	%		CALGARY, LAKEHEAD, LETHBRIDGE, ALBERTA
To Another Institution (Receiving)	%		Mostly B.C. private learning institutions. Examples are: Academy of Learning, Canadian Securities Institute, Certified General Accountants Association of B.C., Compu College School of Business, International School of Correspondence, Southern Alberta Institute of Technology
Experienced Transfer Problems	%	Q15A	Did you have any problems transferring credits?
All Courses Were Accepted	%	Q15B_1	How many courses, if any, did you NOT receive credit for? none
1 or 2 Courses Were Not Accepted	%	Q15B_2	How many courses, if any, did you NOT receive credit for? 1 or 2
3 to 5 Courses Were Not Accepted	%	Q15B_3	How many courses, if any, did you NOT receive credit for? 3 to 5
6 or More Courses Were Not Accepted	%	Q15B_4	How many courses, if any, did you NOT receive credit for? 6 or more
None Were Accepted	%	Q15B_5	How many courses, if any, did you NOT receive credit for? None were accepted
Some Courses Didn't Transfer	%	Q15CA	Did you encounter any of the following transfer problems? Some courses didn't transfer
Delay or Other Difficulty in Submitting Transcripts	%	Q15CB	Did you encounter any of the following transfer problems? Delay or other difficulty in submitting transcripts
Getting an Assessment of Transfer Took a Long Time to Complete	%	Q15CC	Did you encounter any of the following transfer problems? Getting an assessment of transfer took a long time to complete
Original Courses or Program Were Not Designed for Transfer	%	Q15CD	Did you encounter any of the following transfer problems? Original courses or program were not designed for transfer
Had Completed More Credits than Was Allowed to Transfer	%	Q15CE	Did you encounter any of the following transfer problems? Had completed more credits than you were allowed to transfer
Didn't Know or Understand Transfer Requirements	%	Q15CF	Did you encounter any of the following transfer problems? Didn't know or understand transfer requirements
Received Unassigned Credit When Expected Specific Credit	%	Q15CG	Did you encounter any of the following transfer problems? Received unassigned credit when expected to receive specific credit
Had to Repeat One or More of Courses that Were Already Passed	%	Q15CH	Did you encounter any of the following transfer problems? Had to repeat one or more of your courses that you had already passed
Other Problems	%	Q15CI	Did you encounter any of the following transfer problems? Had to repeat one or more of your courses that you had already passed
Number of Transfer Problems Experienced	Average	Q15A ,Q15C	Number of problems checked in the list of Question 15C (9 possible problems: Q15CA to Q15CI).
Extent to Which Transfer Was a Problem	Scale 5-1	Q15D	Overall, how serious would you say those transfer-related problems were?
Poor or Insufficient ADVICE from OLD Institution	%	Q15EA	Were your transfer problems caused, at least in part, by any of the following? Received poor or insufficient advice from your OLD (former) Institution?
Slow or Inadequate SERVICE from OLD (Sending) Institution	%	Q15EB	Were your transfer problems caused, at least in part, by any of the following? Received slow or inadequate SERVICE from your OLD institution
Poor or Insufficient ADVICE from NEW Institution	%	Q15EC	Were your transfer problems caused, at least in part, by any of the following? Received poor or insufficient ADVICE from your NEW (current) Institution
Slow or Inadequate SERVICE from NEW (Receiving) Institution	%	Q15ED	Were your transfer problems caused, at least in part, by any of the following? Received slow or inadequate SERVICE from your NEW (current) institution

Indicator	\$ 1	Question Number	Question of Derivation Mechanism
Poor ADVICE OR SERVICE from OLD Institution	%	Q15EA	Were your transfer problems caused, at least in part, by any of the following? Received poor or insufficient advice from your OLD (former) Institution?
Poor ADVICE OR SERVICE from NEW Institution	%	Q15EC	Were your transfer problems caused, at least in part, by any of the following? Received poor or insufficient ADVICE from your NEW (current) Institution
Attempted to Transfer Original Credential as One Whole Block	%	Q15F	Did you attempt to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study)
Received All the Credits Expected For Block 'l'ransfer	%	Q15G, Q15F	If you attempted to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study), did you receive all the credits you expected?
Relation Between Past and Further Studies	Scale 4-1	Q16	How related to your program at [Name of institution] were/are your further studies at [Name of new institution]? Would you say [List of four ratings] related?
Extent to Which Prepared for Further Study	Scale 4-1	Q16A	How well did the program at [Name of institution] prepare you for your further studies at [Name of new institution]? Would you say you were_
Written Communication	Scale 3-1	Q51A	How well did the program prepare you in :a your ability to write clearly and concisely
Oral Communication	Scale 3-1	Q51B	How well did the program prepare you in :b your ability to speak effectively
Teamwork	Scale 3-1	Q51C	How well did the program prepare you in_ (Would you say_ [List of four choices]) Teamwork and working in groups
Interpersonal Skills	Scale 3-1	Q51D	How well did the program prepare you in:d ability to work effectively with others
Analysis / Problem Solving	Scale 3-1	Q51E	How well did the program prepare you in :e ability to analyze and think critically and your ability to solve problems
Mathematics	Scale 3-1	Q51F	How well did the program prepare you in :f ability to use mathematics appropriate to your field
Use of Computers	Scale 3-1	Q51G	How well did the program prepare you in:g use of computers appropriate to your field
Use of Tools & Equipment	Scale 3-1	Q51H	How well did the program prepare you in:h use of tools and equipment, other than computers
Skills for Independent Learning	Scale 3-1	Q511	How well did the program prepare you in: I skills for learning on your own
Quality of Teaching	Scale 3-1	Q52A	How would you rate: A quality of instruction
Organization of Program Practical Experience	Scale 3-1 Scale 3-1	Q52B Q52D	How would you rate: B organization of the program  How would you rate: D amount of practical experience (e.g. practicum)
Textbooks & Learning Materials	Scale 3-1	Q52E	How would you rate :E textbooks and learning materials
Library Materials	Scale 3-1	Q52F1	How would you rate:F1 library materials
Availability of Instructors Outside Class	Scale 3-1	Q52G	How would you rate: G availability of instructors for help with course work outside of class
Computer Hardware and Software	Scale 3-1	Q52H	How would you rate:H Computer hardware and software
Equipment Other Than Computers	Scale 3-1	Q521	How would you rate: I equipment other than computers
Study Facilities on Campus	Scale 3-1	Q52J	How would you rate :J study facilities on campus
Program and Career Counseling Places on Campus for Socializing	Scale 3-1 Scale 3-1	Q52K Q52L	How would you rate :K program and career counseling How would you rate :L places on campus for socializing with friends
Frequency of Activities with Other Students	Scale 4-1	Q50	While you were at [Name of institution], how often did you spend time doing things with other students outside of class? would you say_
Program Work Load (5=Heavy)	Scale 5-1	Q52M	How would you describe the workload in the program? would you say
In the Labour Force (Have/Looking for Job)	%	Q18 ,Q19,Q06	Are you currently working at a job or business? You said you are not currently working. What is the main reason?
Employed	%	Q18	Are you currently working at a job or business?
In a Permanent Job (Got It After Studies)	%	Q18 ,Q27	Is it a temporary or a permanent position?
Employed in a Non Training-Related Job	%	Q18 ,Q37	To what extent is your [main] job related to the training that you took at [Name of institution]? Would you say [List of four ratings] related?
Employed in a Training-Related Job	%	Q18 ,Q37	To what extent is your [main] job related to the training that you took at [Name of institution]? Would you say [List of four ratings] related?

Indicator		Question Number	Question or Derivation Mechanism
Employed Full-Time (30 hrs or more weekly)	%		How many hours do you work, on average, each week?
Employed Full-Time, Training-Related	%	Q18 ,Q23,Q37	How many hours do you work, on average, each week? To what extent is your [main] job related to the training that you took at [Name of institution]? Would you say [List of four ratings] related?
Employed Full-Time, non Training-Related	%	Q18 ,Q23,Q37, Q19,Q06	How many hours do you work, on average, each week? To what extent is your [main] job related to the training that you took at [Name of institution]? Would you say [List of four ratings] related?
Employed Part-Time	%	Q18 ,Q23	How many hours do you work, on average, each week?
Unemployed	%	Q18 ,Q19,Q06	Are you currently working at a job or business?
Gross Monthly Salary (\$)	Average	Q38,Q38B, Q22,Q23, Q36	What is your gross salary or wage from your [main] job, before deductions?
Gross Monthly Salary of Train-Rel Job (\$)	Average		What is your gross salary or wage from your [main] job, before deductions?  To what extent is your [main] job related to the training that you took at [Name of institution]? Would you say [List of four ratings] related?
Gross Monthly Salary of Non Train-Rel Job (\$)	Average	Q38,Q38B, Q22,Q23,Q 36	What is your gross salary or wage from your [main] job, before deductions? To what extent is your [main] job related to the training that you took at [Name of institution]? Would you say [List of four ratings] related?
Extent to Which Work is as Expected	Scale 3-1	Q39	To what extent is your work in your [main] job what your training led you to expect? would you say_
How Job Ready	Scale 4-1	Q43	How "job ready" were you after leaving [Name of institution]. (that is, how well were you able to perform your job immediately after starting it ?) would you say you were
Usefulness of Training in Getting Job	Scale 4-1	Q40	How useful was your education at [Name of institution] in getting your [main] job? would you say
Usefulness of Training in Performing Job	Scale 4-1	Q41	How useful has your education at [Name of institution] been in performing your job? would you say

# Appendix 2: Cohorts Included in the Study

Cohorts Description	Denominator	Program Type	Years
Students Who Attended Further Studies vs. Students Who Did Not Attend Further Studies	All Arts and Sciences Lower Division with more than 24 credits	Arts and Sciences 24 credits + Lower Division	1995; 1996; 1997; 3 years grouped together
Students That Tried to Transfer vs. Those That Did Not Try	Students Attending Further Studies	Applied Arts and Sciences 24 credits +	1995; 1996; 1997; 3 years grouped together
Had Transfer Problem vs. Did Not Have Transfer Problem	Students Attempting to Transfer Credits	Applied Arts and Sciences 24 credits +	1995; 1996; 1997; 3 years grouped together
Block Transfer Students Experiencing Transfer Problems vs. Non-Block Transfer Students Experiencing Transfer Problems	Students Experiencing Transfer Problems	Applied Arts and Sciences 24 credits +	1997
Students Experiencing Transfer Problems at OLD Institution (Service and Advice) vs. NEW Institution	Students Experiencing Transfer Problems	All	1997

# Appendix 3: List of Arts and Sciences and Applied Programs in the Study

The grouping of college and institute programs by program type (Arts and sciences or applied) is displayed in this appendix. Some indicators are presented by college and institute program: Number of respondents in the three-year cohort, % of them who continued further studies, % who tried to transfer credits and finally, % that experienced transfer problem.

## List of Arts and Sciences and Applied Programs in The Study

Arts and Sciences			Respondents In 1995 or	% Contiuned Further	% Tried to Transfer	% Experienced

**Total Number of Respondents** 

3,850

10,687

The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

n/a Not applicable or any value smaller than 3%.

<sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

Notes.

The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the night cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

Notes:

The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>\*</sup> Relatively small sample size, interpret result with caution.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

n/a Not applicable or any value smaller than 3%.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

<sup>&</sup>lt;sup>3</sup> The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the right cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

<sup>&</sup>lt;sup>1</sup> The shading of an indicator means that the values have a statistical significance. This means that there is a high level of confidence that the two groups are different.

<sup>&</sup>lt;sup>2</sup> For scale indicators, a higher value indicates a more favourable rating. For example, for Scale 3-1, a value of "2.91" is more favourable, or positive, than a value of "2.11"

The "Index" value for each indicator is the value of one cohort group divided by the value of the other group. A value of "1.00" means that the two groups are equivalent. Indicator index values that are greater than "1.00" result when the left cohort group's value is greater than the night cohort group's value. Please note that all calculations use non-rounded cell numbers; rounding occurs only in the presentation of figures.

<sup>&</sup>lt;sup>4</sup> Relatively small sample size, interpret result with caution.

n/a Not applicable or any value smaller than 3%.

# Appendix 5: Questionnaire Content of the 1997 B.C. Survey of Former College and Institute Students

Hello, I'm \_\_\_\_\_ from Campbell Goodell Traynor, a professional market research firm in Vancouver. We are conducting a survey of former college and institute students on behalf of [NAME OF INSTITUTION] and the B.C. Ministry of Education, Skills and Training. The purpose of the survey is to determine if your education was useful in acquiring further education or employment. While your participation is voluntary, it is important that we get your opinions if the results of the survey are to be accurate. All answers will be kept confidential and will only be used for statistical purposes.

### **Introductory Questions to Determine Survey Eligibility**

- Q1 To confirm, did you take courses from [NAME OF INSTITUTION]?
  - YES -- GO TO Q3
  - 2. NO -- CONFIRM NEGATIVE, THEN THANK AND TERMINATE
  - 3. STILL ATTENDING -- GO TO Q4
  - 4. DK / REF -- ATTEMPT TO PROBE, ELSE THANK AND TERMINATE
- Q3 Are you still taking courses at [NAME OF INSTITUTION]?
  - 1. YES -- GO TO Q4
  - 2. NO -- GO TO Q5
  - 3. DK / REF -- ATTEMPT TO PROBE, ELSE THANK AND TERMINATE
- Q4 The records indicate that you were in the [NAME OF PROGRAM] program. Is that correct?
- Q4 ALTERNATE WORDING IF ABE COURSE (ADULT BASIC EDUCATION):

[REC\_TYPE=2 IS AN ABE COURSE]

THE RECORDS INDICATE THAT YOU TOOK AN ADULT BASIC EDUCATION COURSE. IS THAT CORRECT?

- 1. YES -- GO TO Q4B
- 2. NO -- GO TO Q4A
- 3. REFUSED -- GO TO Q4A
- Q4a What did you study?

\_\_ (=CORRECTED NAME OF PROGRAM)

Q4b Are you still in the same program?

#### ALTERNATIVE WORDING IF ABE COURSE (REC\_TYPE=2)

Q4b Are you still taking an ABE course?

- 1. YES -- THANK AND TERMINATE
- 2. NO -- GO TO Q4C
- 3. REFUSED -- GO TO Q4C

Q4c What are you now studying?

\_\_ (=NAME OF SUBSEQUENT PROGRAM)

GO TO SECTION 2

**REFUSED -- GO TO SECTION 2** 

Q5 The records indicate you were in the [NAME OF PROGRAM] program. Is that correct?

GDA Research & Information Systems, Inc.

BCCAT

- Q5 ALTERNATE WORDING IF IN ABE PROGRAM [REC\_TYPE=2] The records indicate you took an ABE course. Is that correct?
  - 1. YES -- GO TO SECTION 2
  - 2. NO -- GO TO O5A
  - 3. DON'T KNOW -- CONTINUE
  - 4. REFUSED - CONTINUE
- Q5a What did you study?

\_ (=CORRECTED NAME OF PROGRAM)

REFUSED -- GO TO SECTION 2

[NOTE: IF NAME OF PROGRAM CORRECTED AS A RESULT OF Q4A OR Q5A, CORRECTED VERSION WILL BE USED IN ALL SUBSEQUENT QUESTIONS.]

#### 2. Past Education

- Q7a Did you learn English as a second language?
  - 1. YES
  - 2. NO GO TO Q7
  - 3. REFUSED

- GO TO Q7

- Q7b IF YES, When was that?
  - 1. AGE 12 OR EARLIER
  - 2. AS A TEENAGER
  - 3. AS AN ADULT
  - 4. COMBINATION OF ABOVE [PROBE FOR MAIN AGE LEARNED]?
  - 5. REFUSED
- Q7 (On a different subject now) <u>Before enrolling at [NAME OF INSTITUTION]</u>, did you complete secondary (high) school?
  - 1. YES
  - 2. NO
  - 3. DON'T KNOW
  - 4. REFUSED
- Q8 Did you take any post-secondary education before enrolling at [NAME OF INSTITUTION]?
  - 1. YES -- GO TO 09
  - 2. NO -- GO TO SA-PATH
  - DON'T KNOW / REFUSED -- GO TO SA-PATH
- Q9 How many years of post-secondary education did you take before enrolling at [NAME OF INSTITUTION]?
  - 1. LESS THAN 1 YEAR
  - 2. 1 YEAR TO LESS THAN 2 YEARS
  - 3. 2 YEARS OR MORE
  - 4. DON'T KNOW
  - 5. REFUSED
- Q9a Had you obtained any certificates, diplomas, or degrees before enrolling at [NAME OF INSTITUTION]?
  - 1. YES
  - 2. NO -- HAD NOT COMPLETED ANY CERTIFICATE, DIPLOMA, OR DEGREE
  - 3. REFUSED
- Q9b IF YES IN Q9a ASK: Which would that be? (MARK ALL THAT APPLY)
  - 1. CERTIFICATE (<2 YEARS OF COURSES)
  - 2. DIPLOMA (2 YEARS OR MORE OF COURSES)
  - 3. DEGREE (UNIVERSITY DEGREE)
  - OTHER
  - DON'T KNOW
  - 6. REFUSED

#### SA-PATH

#### - IF "STILL ATTENDING" (THAT IS, Q1=SA OR Q3=YES) — GO TO STILL ATTENDING PATHWAY (SA-INTRO-OTHERWISE CONTINUE IN NOT ATTENDING PATHWAY)

Q9e Are you presently taking any other education/training?

1. YES

2. NO - GO TO Q10

3. REFUSED

- GO TO O10

Q9f Is it on a full or part time basis?

1. FULL TIME

- 2. PART TIME
- 3. DK/REFUSED

GO TO 012

Q10 Since you took your last course at [NAME OF INSTITUTION], have you taken any fi

forther studies?

(INTERVIEWER: REFERS TO COURSES THAT COULD BE APPLIED FOR CREDIT, CERTIFICATION OR PROFESSIONAL ACCREDITATION. DO NOT INCLUDE SHORT CONTINUING EDUCATION COURSES. IF APPLIED BUT NOT YET ATTENDED, MARK "NO")

- 1. YES
- 2. NO -- GO TO SECTION 3
- DK / REF --

GO TO SECTION 3

Q12 What is the name of the institution at which you were enrolled or at which you are currently enrolled? MAX 6 RESPONSES

(INTERVIEWER: IF ENROLLED AT MORE THAN ONE INSTITUTION SINCE LEAVING [NAME OF INSTITUTION], REPORT <u>CURRENT</u> OR <u>MOST RECENT</u> INSTITUTION; IF CURRENTLY ATTENDING MORE THAN ONE INSTITUTION, MARK ALL THAT APPLY)

#### NOTE: IF OLA PROBE FOR OPEN UNIV OR OPEN COLLEGE

1. BCIT

2. CALGARY (U OF C)

- 3. 3 TO 5 COURSES<WERE NOT ACCEPTED>
- 4. 6 OR MORE COURSES (BUT LESS THAN ALL)<WERE NOT ACCEPTED>
- 5. NONE OF MY COURSES TRANSFERRED<ALL COURSES WERE NOT ACCEPTED>
- 6. DON'T KNOW
- 7. REFUSED

- Append<u>ix 5 Page 5</u> An Assessment of British Columbia's Post-Secondary Education Transfer Issues: The Student Perspective Did you encounter any of the following transfer problems? YES NO DK/REF SOME COURSES DIDN'T TRANSFER. <THIS SHOULD IMPUTED YES - FOR O15B = 2 THRU 5> YES \_\_NO \_\_DK/REF \_\_ DELAY OR OTHER DIFFICULTY IN SUBMITTING DOCUMENTS SUCH AS TRANSCRIPTS. <TO NEW INSTITUTION> YES \_\_NO \_\_DK/REF \_\_ GETTING AN ASSESSMENT OF TRANSFER TOOK A LONG TIME TO COMPLETE YES \_\_ NO \_\_ DK/REF \_\_ ORIGINAL COURSES OR PROGRAM WERE NOT DESIGNED FOR TRANSFER. YES \_\_NO \_\_DK/REF \_\_ HAD COMPLETED MORE CREDITS THAN YOU WERE ALLOWED TO TRANSFER. YES \_\_NO \_\_DK/REF \_\_ DIDN'T KNOW OR UNDERSTAND TRANSFER REQUIREMENTS YES \_\_NO \_\_ DK/REF \_\_ RECEIVED UNASSIGNED CREDIT WHEN EXPECTED TO RECEIVE SPECIFIC CREDIT YES \_\_ NO \_\_ DK/REF \_\_ HAD TO REPEAT ONE OR MORE OF YOUR COURSES THAT YOU HAD ALREADY PASSED OTHER PROBLEM (SPECIFY) Q15D Overall, how serious would you say those transfer-related problems were? 1. VERY SERIOUS 2. SERIOUS 3. SOMEWHAT SERIOUS 4. NOT VERY SERIOUS 5. NOT AT ALL SERIOUS
- Q15E Were your transfer problems caused, at least in part, by any of the following?
  - YES \_\_NO \_\_DK/REF \_\_ RECEIVED POOR OR INSUFFICIENT ADVICE FROM YOUR OLD (FORMER) INSTITUTION
  - YES \_\_NO \_\_DK/REF \_\_ RECEIVED SLOW OR INADEQUATE SERVICE FROM YOUR OLD (FORMER) INSTITUTION
  - YES \_\_NO \_\_DK/REF \_\_ RECEIVED POOR OR INSUFFICIENT <u>ADVICE</u> FROM YOUR <u>NEW</u> (CURRENT) INSTITUTION
  - YES \_\_NO \_\_DK/REF \_\_ RECEIVED SLOW OR INADEQUATE SERVICE FROM YOUR NEW (CURRENT) INSTITUTION
- **O15F** Did you attempt to transfer your original credential (or all completed course-work), as one whole block of credits towards your new (current) program (or field of study)?
  - 1.
  - GO TO 016 2.
  - DON'T KNOW/REFUSED \_\_\_ GO TO Q16
- Q15G If yes, did you receive all the credits you expected?
  - 1. YES \_\_
  - 2. NO\_
  - DON'T KNOW 3.
- Q16 How related to your program at [NAME OF INSTITUTION] were/are your further studies at [NAME OF NEW INSTITUTION]? Would you say...
  - 1. VERY RELATED.
  - 2. SOMEWHAT RELATED,
  - NOT VERY RELATED, OR 3.
  - NOT AT ALL RELATED? 4
  - 5. DON'T KNOW
  - **REFUSED** 6.
- Q16a How well did the program at [NAME OF INSTITUTION] prepare you for your further studies at [NAME OF NEW INSTITUTION]? Would you say you were...
  - 1. VERY WELL PREPARED,
  - 2. SOMEWHAT PREPARED,
  - 3. NOT VERY PREPARED, OR
  - 4. NOT AT ALL PREPARED?
  - DON'T KNOW 5.
  - **REFUSED** 6.
  - **QUESTION IS NOT APPLICABLE**

#### 3. Evaluation of Education

Q44 To answer the next questions, think back to when you first started [NAME OF PROGRAM] at [NAME OF INSTITUTION]. What were your reasons for enrolling? (MARK ALL THAT APPLY) (IF TO "GET A JOB" PROBE FOR 4,5 OR 6)

#### NINE RESPONSES

- 1. COMPLETE A CREDENTIAL (HIGH SCHOOL DIPLOMA, CERTIFICATE, DIPLOMA OR DEGREE) AT THIS INSTITUTION
- 2. PREPARE TO TRANSFER TO ANOTHER INSTITUTION
- 3. QUALIFY TO ENTER A PROGRAM IN ANOTHER FIELD
- 4. IMPROVE EXISTING JOB SKILLS
- 5. LEARN NEW JOB SKILLS
- 6. DECIDE ON A CAREER / CHANGE CAREERS
- 7. PERSONAL INTEREST
- 8. IMPROVE BASIC SKILLS, (READING/WRITING OR MATH SKILLS)
- 95. OTHER (SPECIFY)
- 97 DON'T KNOW
- 98 REFUSED
- Q45 To what extent did you achieve your most important objective for enrolling? Would you say it was...
  - COMPLETELY MET.
  - 2. MOSTLY MET,
  - 3. NOT REALLY MET, OR
  - 4. NOT MET AT ALL?
  - 5. DON'T KNOW
  - REFUSED
- Q47 When you left [NAME OF INSTITUTION], had you completed the requirements for a credential such as a degree, diploma, or certificate? (COMPLETING HIGH SCHOOL OR EQUIVALENT IS A CREDENTIAL FOR ABE STUDENTS)
  - 1. YES
  - 2. NO
  - DON'T KNOW
  - REFUSED
- Q48 What was your main reason for leaving [NAME OF PROGRAM] at [NAME OF INSTITUTION] when you did?(MARK ALL THAT APPLY.)
  - 1. COMPLETED ALL THE CREDITS I NEEDED
  - 2. CHANGED MIND ABOUT PROGRAM/JOB GOALS OR PLAN CHANGED
  - 3. TRANSFERRED TO/OUALIFIED FOR ADMISSION AT OTHER INSTITUTION/PROGRAM
  - 4. DISAPPOINTED WITH PROGRAM OR COLLEGE/INSTITUTE
  - 5. DISAPPOINTED WITH OWN PERFORMANCE / FAILED PROGRAM
  - 6. GOT A JOB / DECIDED TO WORK /BECAME SELF EMPLOYED
  - 0. JOB SITUATION CHANGED (HAVE A JOB)
  - 7. CONVENIENCE (E.G. TRANSPORTATION, SCHEDULING)
  - 8. PERSONAL CIRCUMSTANCES (E.G. HEALTH, FAMILY/FINANCES)
  - 95 OTHER (SPECIFY)
  - 97. DON'T KNOW
  - 98. REFUSED
- Q49 How satisfied were you with your studies in [NAME OF PROGRAM] at [NAME OF INSTITUTION]? Would you say you were...
  - 1. COMPLETELY SATISFIED.
  - 2. MAINLY SATISFIED,
  - 3. PARTIALLY SATISFIED, OR
  - 4. NOT SATISFIED AT ALL?
  - DON'T KNOW
  - 6. REFUSED

Q50 While you were at [NAME OF INSTITUTION], how often did you spend time interacting or doing things with other students outside of class? Would you say...

# (INTERVIEWER: INCLUDE COURSE-RELATED (E.G. STUDY GROUPS, COULD INCLUDE TELEPHONE, E-MAIL, ETC.) AND NON-COURSE RELATED ACTIVITIES (E.G. SPORTS))

- FAIRLY OFTEN.
- ONCE IN A WHILE,
- HARDLY EVER, OR
- 4. NOT AT ALL?
- 5. DON'T KNOW
- 6. REFUSED
- Q50b Were you in a Cooperative Education program?
  - 1 YES
  - 2 NO
- GO TO Q51
  - 3 DK GO TO Q51
- Q50c Did you do all the work placements?
  - YES
  - 2 NO
  - 3 DK
- Q51 I'm now going to ask you to rate certain aspects of the program at [NAME OF INSTITUTION]. Afterwards, I'll ask for your own comments on the program..I'd like you to rate the extent to which your program provided you with an opportunity to develop the following skills. Some of these skills may not be relevant to your particular program; if so, just say "not applicable".

How well did the program prepare you in [A - K], Would you say...

- 1. WELL
- 2. ADEQUATELY
- 3. POORLY
- 4. NOT APPLICABLE
- 5. DON'T KNOW
- 6. REFUSED
- A YOUR ABILITY TO WRITE CLEARLY AND CONCISELY
- B YOUR ABILITY TO SPEAK EFFECTIVELY
- D ABILITY TO WORK EFFECTIVELY WITH OTHERS
- E ABILITY TO ANALYZE AND THINK CRITICALLY AND YOUR ABILITY TO SOLVE PROBLEMS
- F ABILITY TO USE MATHEMATICS APPROPRIATE TO YOUR FIELD
- G USE OF COMPUTERS APPROPRIATE TO YOUR FIELD
- H USE OF TOOLS AND EQUIPMENT, OTHER THAN COMPUTERS
- I SKILLS FOR LEARNING ON YOUR OWN
- J. READING AND COMPREHENSION SKILLS
- K. ENTREPRENEURIAL SKILLS
- Q52 In the next questions, I want you to rate certain aspects of your program at [NAME OF INSTITUTION] using the scale "good, adequate or poor":
  - 1. GOOD
  - 2. ADEQUATE
  - 3. POOR
  - 4. NOT APPLICABLE
  - 5. DON'T KNOW
  - 6. REFUSED

#### (INTERVIEWER: RATING IS TO BE ON AVERAGE)

- A QUALITY OF INSTRUCTION (INTERVIEWER: INCLUDES INSTITUTION
- **TUTORING AND TEACHING)**
- B ORGANIZATION OF THE PROGRAM
- D AMOUNT OF PRACTICAL EXPERIENCE (E.G. PRACTICUM)
- E TEXTBOOKS AND LEARNING MATERIALS
- F1. LIBRARY MATERIALS
- F2. LIBRARY SERVICES

- Q43 How "job ready" were you after leaving [NAME OF INSTITUTION]. (That is, how well were you able to perform your job immediately after starting it?) Would you say you were.....
  - ENTIRELY JOB READY.
  - 2 SOMEWHAT JOB READY.
  - 3 NOT REALLY JOB READY, OR
  - 4 NOT AT ALL JOB READY?
  - DON'T KNOW
  - 6. REFUSED

## **BEGINNING OF "STILL ATTENDING" PATHWAY**

[NAME OF PROGRAM] = PREVIOUS PROGRAM FOR WHICH RESPONDENT WAS SELECTED FOR SURVEY [NAME OF SUBSEQUENT PROGRAM] = CURRENT PROGRAM OF STUDY (AT SAME INSTITUTION) [RESPONSES TO Q10 TO Q14 COULD BE IMPUTED FROM OTHER QUESTIONS FOR THIS POPULATION]

#### SA-INTRO

You were selected for this survey because of your previous studies in [NAME OF PROGRAM]. Many of the questions will refer back to that program, [IF ABE "those courses"] rather than your current studies.

## 3. Evaluation of Education

- SAQ44 To answer the next questions, think back to when you first started the [NAME OF PROGRAM] (program) (IF ABE courses) at [NAME OF INSTITUTION]. What were your reasons for enrolling?(MARK ALL THAT APPLY)
  - 1 COMPLETE A CREDENTIAL (HIGH SCHOOL DIPLOMA, CERTIFICATE, DIPLOMA OR DEGREE)
    AT THIS INSTITUTION
  - 2 PREPARE TO TRANSFER TO ANOTHER INSTITUTION
  - 3 QUALIFY TO ENTER A PROGRAM IN ANOTHER FIELD
  - 4 IMPROVE EXISTING JOB SKI LLS
  - 5 LEARN NEW JOB SKILLS
  - 6 DECIDE ON A CAREER/ CHANGE CAREERS
  - 7 PERSONAL INTEREST
  - 8 IMPROVE BASIC SKILLS, (READING/WRITING OR MATH SKILLS)
  - 95 OTHER (SPECIFY)
  - 97 DON'T KNOW
  - 98 REFUSED
- SAQ45 To what extent did you achieve your most important objective for enrolling? Would you say it was...
  - 1 COMPLETELY MET.
  - 2 MOSTLY MET,
  - 3 NOT REALLY MET, OR
  - 4 NOT MET AT ALL?
  - 5. DON'T KNOW
  - 6. REFUSED

- SAQ47 When you left the [NAME OF PROGRAM] (program) (IF ABE courses), had you completed the requirements for a credential such as a degree, diploma, or certificate? (COMPLETING HIGH SCHOOL OR EQUIVALENT IS A CREDENTIAL FOR ABE STUDENTS)
  - 1 YES
  - 2 NO
  - 3. DON'T KNOW
  - 4. REFUSED
- SAQ48 What was your <u>main</u> reason for leaving the [NAME OF PROGRAM] (program) (IF ABE courses) at [NAME OF INSTITUTION] when you did? [MARK ALL THAT APPLY]
  - 1 COMPLETED ALL THE CREDITS I NEEDED
  - 2 CHANGED MIND ABOUT PROGRAM/JOB GOALS OR PLANS CHANGED
  - 3 TRANSFERRED TO / QUALIFIED FOR ADMISSION AT OTHER INSTITUTION/PROGRAM
  - 4 DISAPPOINTED WITH PROGRAM OR COLLEGE/INSTITUTE
  - 5 DISAPPOINTED WITH OWN PERFORMANCE / FAILED PROGRAM
  - 6 GOT A JOB / DECIDED TO WORK /BECAME SELF EMPLOYED
  - 0 JOB SITUATION CHANGED (HAVE A JOB)
    - 7 CONVENIENCE (E.G. TRANSPORTATION, SCHEDULING)
  - 8 PERSONAL CIRCUMSTANCES (E.G.HEALTH, FAMILY/FINANCES)
  - 95 OTHER (SPECIFY) \_\_\_\_\_
  - 97 DON'T KNOW
  - 98 REFUSED
- SAQ49 How satisfied were you with your studies in [NAME OF PROGRAM] at

[NAME OF INSTITUTION]? WOULD YOU SAY YOU WERE...

- 1 COMPLETELY SATISFIED.
- 2 MAINLY SATISFIED.
- 3 PARTIALLY SATISFIED, OR
- 4. NOT SATISFIED AT ALL?
- 5. DON'T KNOW
- 6. REFUSED
- SAQ50 While you were in the [NAME OF PROGRAM] (program) (IF ABE courses), how often did you spend time interacting or doing things with other students outside of class? Would you say

## (INTERVIEWER: INCLUDE COURSE-RELATED (E.G. STUDY GROUPS) AND NON-COURSE-RELATED ACTIVITIES (E.G. SPORTS) COULD INCLUDE TELEPHONE, E-MAIL ETC.)

- 1 FAIRLY OFTEN,
- 2 ONCE IN A WHILE,
- 3 HARDLY EVER, OR
- 4 NOT AT ALL?
- 5. DON'T KNOW
- 6. REFUSED
- SAQ50b Were you in a Cooperative Education program?
  - 1 YES
  - 2 NO- GO TO Q51
  - 3 DK- GO TO Q51

SAQ50c Did you do all the work placements?

- 1 YES
- 2 NO
- 3 DK
- SAQ51 I'm now going to ask you to rate certain aspects of the [NAME OF PROGRAM] program. Afterwards, I'll ask for your own comments on the program. I'd like you to rate the extent to which your program provided you with an opportunity to develop the following skills. Some of these skills may not be relevant to your particular program; if so, just say "not applicable".

HOW WELL DID THE PROGRAM [IF ABE COURSES] PREPARE YOU IN.....[A-K] WOULD YOU SAY.....

- 1. WELL
- 2. ADEQUATELY
- POORLY

- 4. NOT APPLICABLE
- 5. DON'T KNOW
- 6. REFUSED
- A YOUR ABILITY TO WRITE CLEARLY AND CONCISELY
- B YOUR ABILITY TO SPEAK EFFECTIVELY
- D ABILITY TO WORK EFFECTIVELY WITH OTHERS
- E ABILITY TO ANALYZE OR THINK CRITICALLY, AND YOUR ABILITY TO SOLVE PROBLEMS
- F ABILITY TO USE THE MATHEMATICS APPROPRIATE FOR YOUR FIELD
- G USE OF COMPUTERS APPROPRIATE FOR YOUR FIELD
- H USE OF TOOLS AND EQUIPMENT, OTHER THAN COMPUTERS
- I SKILLS FOR LEARNING ON YOUR OWN
- J. READING AND COMPREHENSION SKILLS
- K. ENTREPRENEURIAL SKILLS

SAQ52 In the next questions, I want you to rate certain aspects of your program [IF ABE course] at [NAME OF INSTITUTION] using the scale "good, adequate or poor":

- GOOD.
- 2. ADEQUATE
- 3. POOR
- 4. NOT APPLICABLE
- 5. DON'T KNOW
- 6. **REFUSED**

### (INTERVIEWER: RATING IS TO BE ON AVERAGE)

- A QUALITY OF INSTRUCTION (INTERVIEWER: INCLUDES INSTITUTION TUTORING AND TEACHING)
- B ORGANIZATION OF THE PROGRAM [IF ABE COURSE]
- D AMOUNT OF PRACTICAL EXPERIENCE (E.G. PRACTICUM)
- E TEXTBOOKS AND LEARNING MATERIALS
- F1 LIBRARY MATERIALS
- F2 LIBRARY SERVICES
- G AVAILABILITY OF INSTRUCTORS OR TUTORS FOR HELP ON COURSE WORK OUTSIDE OF CLASS
- H COMPUTER HARDWARE AND SOFTWARE
- I EQUIPMENT OTHER THAN COMPUTERS
- J STUDY FACILITIES ON CAMPUS
- K PROGRAM AND CAREER COUNSELING

## (INTERVIEWER: REFERS TO ADVICE FROM COLLEGE STAFF, SUCH AS PROGRAM ADVISORS OR COUNSELLORS, NOT FROM COURSE INSTRUCTORS)

L PLACES ON CAMPUS FOR SOCIALIZING WITH FRIENDS

SAQ52N How would you describe the workload in the program [IF ABE courses]?

WOULD YOU SAY...

- I VERY HEAVY,
- 2 HEAVY,
- 3 ABOUT RIGHT,
- 4 LIGHT, OR
- 5 VERY LIGHT?
- 6. DON'T KNOW
- 7. REFUSED

SAQ53A (FOR ECIAD STUDENTS ONLY) What was your main reason for selecting Emily Carr Institute of Art and Design?

SAQ53B (FOR ECIAD STUDENTS ONLY) To what extent did the Institute meet enrolled? Would you say it [READ LIST]...

the expectations you had when you

- 1. COMPLETELY MET YOUR EXPECTATIONS,
- 2. MAINLY MET YOUR EXPECTATIONS,
- 3. PARTIALLY MET YOUR EXPECTATIONS, OR

•

GDA Research & Information Systems, Inc.

- 4. DID NOT MEET YOUR EXPECTATIONS AT ALL?
- 5. DON'T KNOW
- 6. REFUSED

SAQ59A How many, if any, of your courses from [NAME OF INSTITUTION] were delivered by means other than traditional classroom instruction, such as correspondence or computer-managed instruction? [INTERVIEWER NOTE: ALSO INCLUDES AUDIO OR VIDEO CASSETTE, INTERNET, TELEPHONE OR VIDEO CONFERENCING]

- 1. NONE
- 1 OR TWO COURSES
- 3. 3 OR MORE COURSES
- 4. DON'T KNOW
- 5. REFUSED

SAQ53	INSTITU	ld the education or TION] be improv CATION.)											
SAQ54	Do you have any other general comments about your education or training in the [NAME OF PROGRAM] (program (IF ABE courses)?												
	1 2	YES GO TO SAO NO	Q54A
